

## R-Car Proactive Partner Solution IoT.bzh redpesk

### Solution Summary

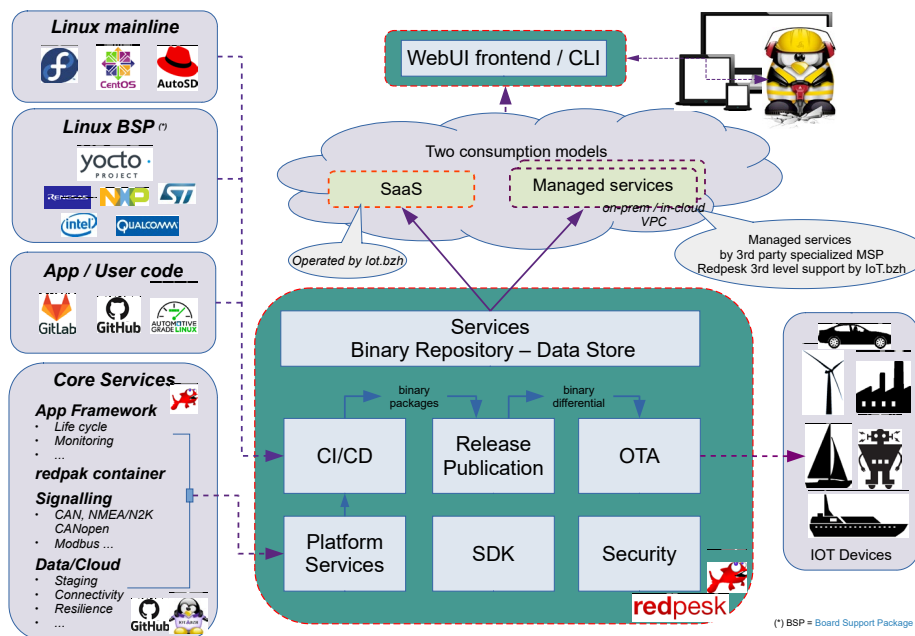

Our solution is an all-in-one embedded Linux platform (factory and distribution) based on IT technology adapted to embedded constraints ([www.redpesk.bzh](http://www.redpesk.bzh))

### Features/Benefits

- Easy-to-use
- Long Term Support
- Cybersecurity
- Lean R&D projects

redpesk enables fast embedded Linux projects as no build system expertise is required to use it. Leveraging IT standard distributions, we can propose +10 years LTS. Then we maximize cybersecurity automation. Last but not least, our solution is modular and allows clear responsibility split between R&D teams.

### Diagrams/Graphics

### Target Markets and Applications

- Automotive
- Military & Aeronautics
- Marine
- Energy
