To our customers,

Old Company Name in Catalogs and Other Documents

On April 1st, 2010, NEC Electronics Corporation merged with Renesas Technology Corporation, and Renesas Electronics Corporation took over all the business of both companies. Therefore, although the old company name remains in this document, it is a valid Renesas Electronics document. We appreciate your understanding.

Renesas Electronics website: http://www.renesas.com

April 1st, 2010
Renesas Electronics Corporation

Issued by: Renesas Electronics Corporation (http://www.renesas.com)

Send any inquiries to http://www.renesas.com/inquiry.

Notice

1. All information included in this document is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas Electronics products listed herein, please confirm the latest product information with a Renesas Electronics sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas Electronics such as that disclosed through our website.
2. Renesas Electronics does not assume any liability for infringement of patents, copyrights, or other intellectual property rights of third parties by or arising from the use of Renesas Electronics products or technical information described in this document. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
3. You should not alter, modify, copy, or otherwise misappropriate any Renesas Electronics product, whether in whole or in part.
4. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation of these circuits, software, and information in the design of your equipment. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from the use of these circuits, software, or information.
5. When exporting the products or technology described in this document, you should comply with the applicable export control laws and regulations and follow the procedures required by such laws and regulations. You should not use Renesas Electronics products or the technology described in this document for any purpose relating to military applications or use by the military, including but not limited to the development of weapons of mass destruction. Renesas Electronics products and technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations.
6. Renesas Electronics has used reasonable care in preparing the information included in this document, but Renesas Electronics does not warrant that such information is error free. Renesas Electronics assumes no liability whatsoever for any damages incurred by you resulting from errors in or omissions from the information included herein.
7. Renesas Electronics products are classified according to the following three quality grades: "Standard", "High Quality", and "Specific". The recommended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below. You must check the quality grade of each Renesas Electronics product before using it in a particular application. You may not use any Renesas Electronics product for any application categorized as "Specific" without the prior written consent of Renesas Electronics. Further, you may not use any Renesas Electronics product for any application for which it is not intended without the prior written consent of Renesas Electronics. Renesas Electronics shall not be in any way liable for any damages or losses incurred by you or third parties arising from the use of any Renesas Electronics product for an application categorized as "Specific" or for which the product is not intended where you have failed to obtain the prior written consent of Renesas Electronics. The quality grade of each Renesas Electronics product is "Standard" unless otherwise expressly specified in a Renesas Electronics data sheets or data books, etc.

   "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; and industrial robots.

   "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control systems; anti-disaster systems; anti-crime systems; safety equipment; and medical equipment not specifically designed for life support.

   "Specific": Aircraft; aerospace equipment; submersible repeaters; nuclear reactor control systems; medical equipment or systems for life support (e.g. artificial life support devices or systems), surgical implantations, or healthcare intervention (e.g. excision, etc.), and any other applications or purposes that pose a direct threat to human life.
8. You should use the Renesas Electronics products described in this document within the range specified by Renesas Electronics, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas Electronics shall have no liability for malfunctions or damages arising out of the use of Renesas Electronics products beyond such specified ranges.
9. Although Renesas Electronics endeavors to improve the quality and reliability of its products, semiconductor products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Further, Renesas Electronics products are not subject to radiation resistance design. Please be sure to implement safety measures to guard them against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas Electronics product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or system manufactured by you.
10. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. Please use Renesas Electronics products in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. Renesas Electronics assumes no liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
11. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products, or if you have any other inquiries.

(Note 1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its majority-owned subsidiaries.

(Note 2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.

HA17555 Series

Precision Timer

REJ03D0681-0100
(Previous: ADE-204-064)
Rev.1.00
Jun 15, 2005

Description

HA17555 Series are ICs designed for accurate time delays or oscillations. It provides both of trigger terminal and reset terminal in order to enable a wide scope of application including Mono Multi Vibrator and Astable Multi Vibrator, and the number of external components is fewer. Further, it's compatible with NE555 of singnetics.

Features

- Mono multi vibrator can be constructed with one resistor and one capacitor.
- Astable multi vibrator can be constructed with two resistors and one capacitor.
- Delay time can be established widely from several µ seconds to several hours.
- Pulse Duty can be controlled.
- The maximum value of both sink current and source current is 200mA.
- Direct connection of output to TTL is possible.
- Temperature/delay time ratio is 50 ppm/°C (typ).
- Output is normally in the on and off states.

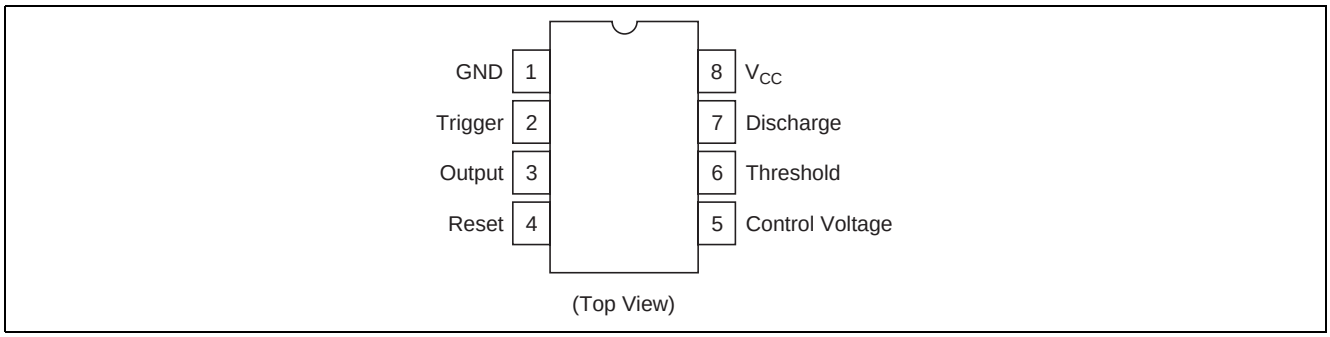
Ordering Information

Application	Type No.	Package Code (Previous Code)
Industrial use	HA17555PS	PRDP0008AF-A (DP-8B)
	HA17555FP	PRSP0008DE-B (FP-8DGV)
Commercial use	HA17555	PRDP0008AF-A (DP-8B)
	HA17555F	PRSP0008DE-B (FP-8DGV)

Applications

- Delay Time Generator (Mono Multi Vibrator)
- Pulse Generator (Astable Multi Vibrator)
- Pulse Width Modulator
- Pulse Location Modulator
- Miss Pulse Detector

Pin Arrangement

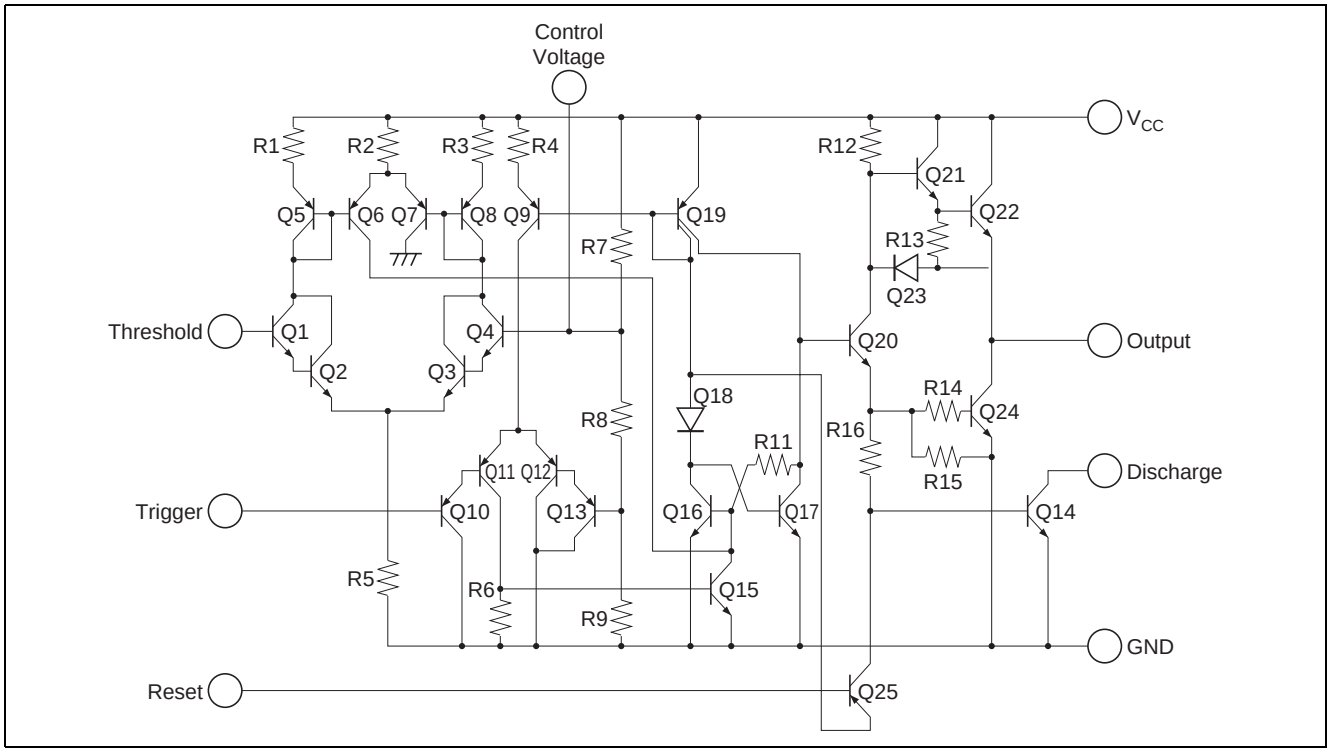


(Top View)

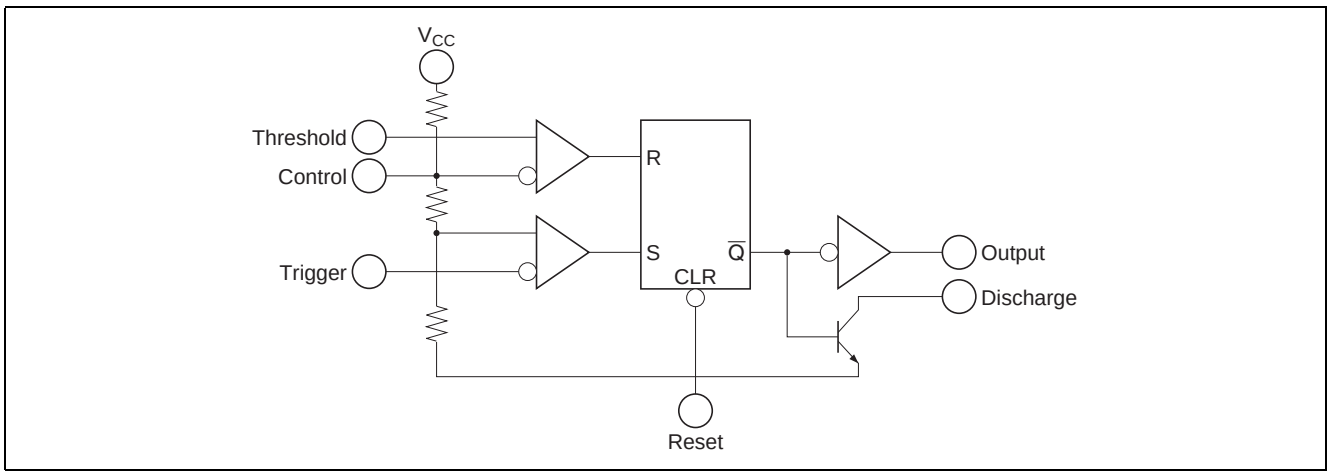
Pin Description

Pin No.	Function
1	Ground pin
2	Trigger pin
3	Output pin
4	Reset pin
5	Control voltage pin
6	Threshold pin
7	Discharge pin
8	V_{CC} pin

Circuit Schematic



Block Diagram

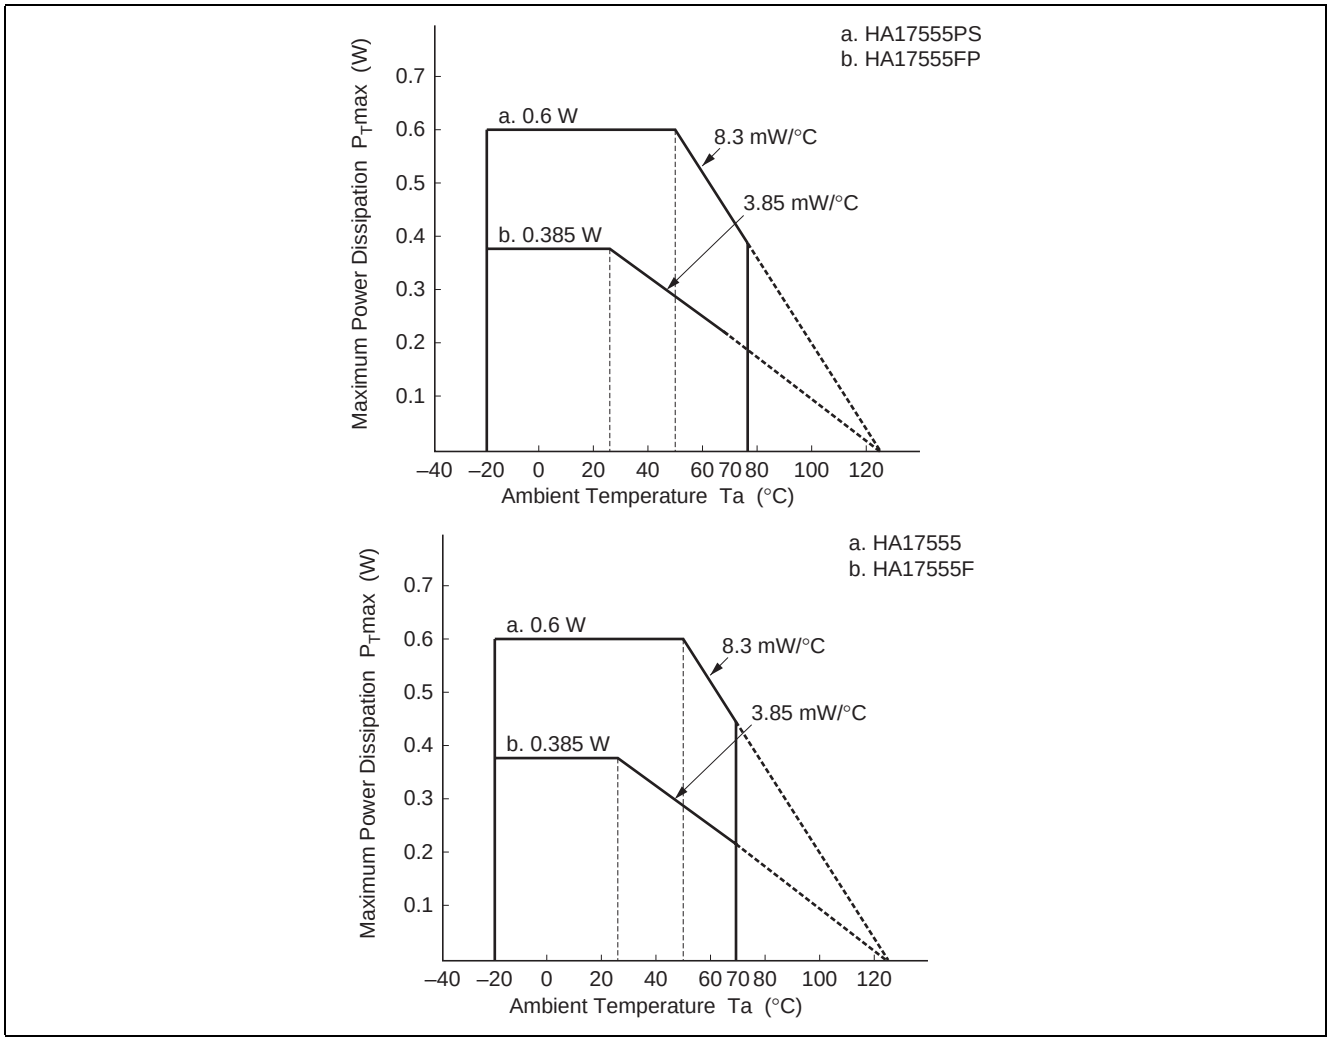


Absolute Maximum Ratings

(Ta = 25°C)

Item	Symbol	HA17555PS/FP	HA17555/F	Unit
Supply voltage	V_{CC}	18	18	V
Discharge current	I_T	200	200	mA
Output source current	Isource	200	200	mA
Output sink current	Isink	200	200	mA
Power dissipation*[1]	P_T	600/385	600/385	mW
Operating temperature	Topr	–20 to +75	–20 to +70	°C
Storage temperature	Tstg	–55 to +125	–55 to +125	°C

Note: 1. For the HA17555/PS,
This value applies up to Ta = 50°C; at temperatures above this, 8.3mW/°C derating should be applied.
For the HA17555F/FP,
This value applies up to Ta = 25°C; at temperatures above this, 3.85mW/°C derating should be applied.
See notes on SOP Package Usage in Reliability section.



Electrical Characteristics

(V_{CC} = 5 to 15 V, Ta = 25°C)

Item	Symbol	Min	Typ	Max	Unit	Test conditions
Supply voltage*[1]	V_{CC}	4.5	—	16.0	V	
Supply current	I_{CC}	—	3.0	6.0	mA	V_{CC} = 5 V, R_L = ∞
	I_{CC}	—	10	15	mA	V_{CC} = 15 V, R_L = ∞
Timing error*[2] (Inherent error)	Et	—	1.0	—	%	
Timing error*[2] (Ta dependency)	Et	—	50	—	ppm/°C	Ta = –20 to + 75°C
Timing error*[2] (Voltage dependency)	Et	—	0.01	—	%/V	V_{CC} = 5 to 15 V
Threshold voltage	Vth	—	2/3	—	V × V_{CC}	
Trigger voltage	V_T	—	5.0	—	V	V_{CC} = 15 V
	V_T	—	1.67	—	V	V_{CC} = 5 V
Trigger current	I_T	—	0.5	—	µA	
Reset voltage	V_R	0.2	0.5	1.0	V	
Reset current	I_R	—	0.1	—	mA	
Threshold current	Ith*[3]	—	0.1	0.25	µA	
Control voltage	V_{CL}	9	10	11	V	V_{CC} = 15 V
	V_{CL}	2.6	3.33	4.0	V	V_{CC} = 5 V
Output voltage	V_{OL}	—	0.1	0.25	V	V_{CC} = 15 V, Isink = 10 mA
		—	0.4	0.75	V	V_{CC} = 15 V, Isink = 50 mA
		—	2.0	2.5	V	V_{CC} = 15 V, Isink = 100 mA
		—	2.5	—	V	V_{CC} = 15 V, Isink = 200 mA
		—	0.25	0.35	V	V_{CC} = 5 V, Isink = 5 mA
Output voltage	V_{OH}	—	12.5	—	V	V_{CC} = 15 V, Isource = 200 mA
		12.75	13.3	—	V	V_{CC} = 15 V, Isource = 100 mA
		2.75	3.3	—	V	V_{CC} = 5 V, Isource = 100 mA
Output rise time	t_r	—	100	—	ns	No loading
Output fall time	t_f	—	100	—	ns	No loading
Oscillation pulse width*[4]	tw	10.0	—	—	ns	

Notes: 1. When output is low (When it is high, I_{CC} is lower by 1 mA typically.)

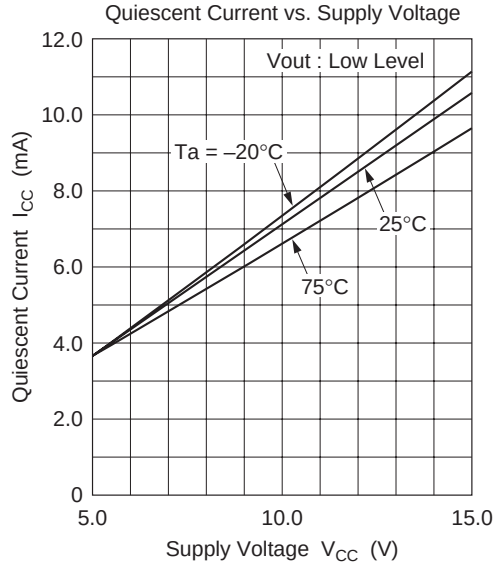
2. R_A, R_B = 1 k to 100 kΩ, C = 0.1 µF, V_{CC} = 5 V or 15 V.

3. (R_A + R_B) at V_{CC} = 15 V is determined by the value of Ith. It is 20 MΩ Max.

4. Output pulse width at mono multi circuit. Output high level pulse width at astable circuit.

Characteristic Curves

Quiescent Current vs. Supply Voltage



Supply Voltage (V_{CC}) Output Voltage (V_{OH}) vs. Source Current
