To our customers,

Old Company Name in Catalogs and Other Documents

On April 1st, 2010, NEC Electronics Corporation merged with Renesas Technology Corporation, and Renesas Electronics Corporation took over all the business of both companies. Therefore, although the old company name remains in this document, it is a valid Renesas Electronics document. We appreciate your understanding.

RENESAS

Notice

1. All information included in this document is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas Electronics products listed herein, please confirm the latest product information with a Renesas Electronics sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas Electronics such as that disclosed through our website.
2. Renesas Electronics does not assume any liability for infringement of patents, copyrights, or other intellectual property rights of third parties by or arising from the use of Renesas Electronics products or technical information described in this document. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
3. You should not alter, modify, copy, or otherwise misappropriate any Renesas Electronics product, whether in whole or in part.
4. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation of these circuits, software, and information in the design of your equipment. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from the use of these circuits, software, or information.
5. When exporting the products or technology described in this document, you should comply with the applicable export control laws and regulations and follow the procedures required by such laws and regulations. You should not use Renesas Electronics products or the technology described in this document for any purpose relating to military applications or use by the military, including but not limited to the development of weapons of mass destruction. Renesas Electronics products and technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations.
6. Renesas Electronics has used reasonable care in preparing the information included in this document, but Renesas Electronics does not warrant that such information is error free. Renesas Electronics assumes no liability whatsoever for any damages incurred by you resulting from errors in or omissions from the information included herein.
7. Renesas Electronics products are classified according to the following three quality grades: “Standard”, “High Quality”, and “Specific”. The recommended applications for each Renesas Electronics product depends on the product’s quality grade, as indicated below. You must check the quality grade of each Renesas Electronics product before using it in a particular application. You may not use any Renesas Electronics product for any application categorized as “Specific” without the prior written consent of Renesas Electronics. Further, you may not use any Renesas Electronics product for any application for which it is not intended without the prior written consent of Renesas Electronics. Renesas Electronics shall not be in any way liable for any damages or losses incurred by you or third parties arising from the use of any Renesas Electronics product for an application categorized as “Specific” or for which the product is not intended where you have failed to obtain the prior written consent of Renesas Electronics. The quality grade of each Renesas Electronics product is “Standard” unless otherwise expressly specified in a Renesas Electronics data sheets or data books, etc.

   “Standard”: Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; and industrial robots.

   “High Quality”: Transportation equipment (automobiles, trains, ships, etc.); traffic control systems; anti-disaster systems; anti-crime systems; safety equipment; and medical equipment not specifically designed for life support.

   “Specific”: Aircraft; aerospace equipment; submersible repeaters; nuclear reactor control systems; medical equipment or systems for life support (e.g. artificial life support devices or systems), surgical implantations, or healthcare intervention (e.g. excision, etc.), and any other applications or purposes that pose a direct threat to human life.
8. You should use the Renesas Electronics products described in this document within the range specified by Renesas Electronics, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas Electronics shall have no liability for malfunctions or damages arising out of the use of Renesas Electronics products beyond such specified ranges.
9. Although Renesas Electronics endeavors to improve the quality and reliability of its products, semiconductor products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Further, Renesas Electronics products are not subject to radiation resistance design. Please be sure to implement safety measures to guard them against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas Electronics product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or system manufactured by you.
10. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. Please use Renesas Electronics products in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. Renesas Electronics assumes no liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
11. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products, or if you have any other inquiries.

(Note 1) “Renesas Electronics” as used in this document means Renesas Electronics Corporation and also includes its majority-owned subsidiaries.

(Note 2) “Renesas Electronics product(s)” means any product developed or manufactured by or for Renesas Electronics.

DATA SHEET

RENESAS

MOS FIELD EFFECT TRANSISTOR

μPA2350

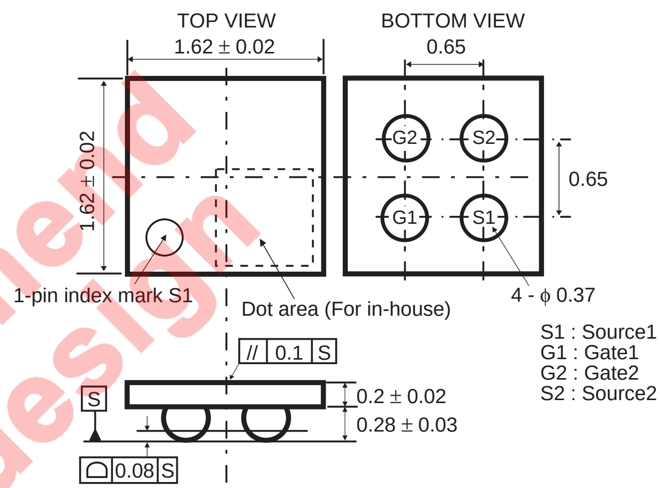
DUAL Nch MOSFET FOR SWITCHING

DESCRIPTION

The μPA2350 is a Dual N-channel MOSFET designed for Li-ion battery protection circuit.

Ecologically Flip chip MOSFET for Lithium-Ion battery Protection (EFLIP).

OUTLINE DRAWING (Unit: mm)



FEATURES

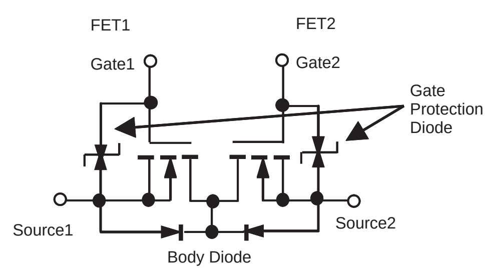
- Monolithic Dual MOSFET
  The Drain connection on circuit board is unnecessary, because Drains of 2MOSFET are internally connected.
- 2.5 V drive available and low on-state resistance
  $R_{SS(on)1}$ = 35 mΩ MAX. (V_{GS} = 4.5 V, I_S = 3.0 A)
  $R_{SS(on)2}$ = 37 mΩ MAX. (V_{GS} = 4.0 V, I_S = 3.0 A)
  $R_{SS(on)3}$ = 44 mΩ MAX. (V_{GS} = 3.1 V, I_S = 3.0 A)
  $R_{SS(on)4}$ = 55 mΩ MAX. (V_{GS} = 2.5 V, I_S = 3.0 A)
- Built-in G-S protection diode against ESD
- Pb-free Bump

ORDERING INFORMATION

PART NUMBER	PACKAGE
μPA2350T1G-E4-A	4pinEFLIP

Remark "-A" indicates Pb-free (This product does not contain Pb in external electrode and other parts)."-E4" indicates the unit orientation (E4 only).

EQUIVALENT CIRCUIT



ABSOLUTE MAXIMUM RATINGS (T_A = 25°C)

Source to Source Voltage (V_{GS} = 0 V)	V_{SSS}	20	V
Gate to Source Voltage (V_{SS} = 0 V)	V_{GSS}	±12	V
Source Current (DC) Note1	$I_{S(DC)}$	6.0	A
Source Current (pulse) Note2	$I_{S(pulse)}$	±60	A
Total Power Dissipation Note1	P_T	1.3	W
Channel Temperature	T_{ch}	150	°C
Storage Temperature	T_{stg}	–55 to +150	°C

Notes 1. Mounted on ceramic board of 50 cm^2 × 1.0mm

2. PW ≤ 100 μs, Single pulse

Remark The diode connected between the gate and source of the transistor serves as a protector against ESD. When this device actually used, an additional protection circuit is externally required if a voltage exceeding the rated voltage may be applied to this device.

The information in this document is subject to change without notice. Before using this document, please confirm that this is the latest version.
Not all products and/or types are available in every country. Please check with an NEC Electronics sales representative for availability and additional information.

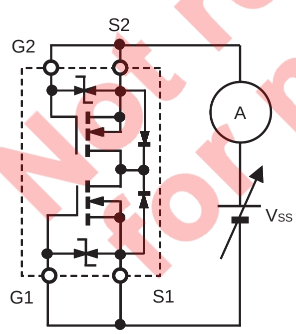
ELECTRICAL CHARACTERISTICS (T_A = 25°C) These are common to FET1 and FET2.

CHARACTERISTICS	SYMBOL	TEST CONDITIONS	MIN.	TYP.	MAX.	UNIT
Zero Gate Voltage Source Current	I_{SSS}	V_{SS} = 20 V, V_{GS} = 0 V, TEST CIRCUIT 1			1	μA
Gate Leakage Current	I_{GSS}	V_{GS} = ±12 V, V_{SS} = 0 V, TEST CIRCUIT 2			±10	μA
Gate Cut-off Voltage	$V_{GS(off)}$	V_{SS} = 10 V, I_S = 1.0 mA, TEST CIRCUIT 3	0.5	1.0	1.5	V
Forward Transfer Admittance Note	$\| y_{fs} \|$	V_{SS} = 10 V, I_S = 3.0 A, TEST CIRCUIT 4	2.5	8.0		S
Source to Source On-state Resistance Note.	$R_{SS(on)1}$	V_{GS} = 4.5 V, I_S = 3.0 A, TEST CIRCUIT 5	22	28	35	mΩ
	$R_{SS(on)2}$	V_{GS} = 4.0 V, I_S = 3.0 A, TEST CIRCUIT 5	23	29	37	mΩ
	$R_{SS(on)3}$	V_{GS} = 3.1 V, I_S = 3.0 A, TEST CIRCUIT 5	24	33	44	mΩ
	$R_{SS(on)4}$	V_{GS} = 2.5 V, I_S = 3.0 A, TEST CIRCUIT 5	30	41	55	mΩ
Input Capacitance	C_{iss}	V_{SS} = 10 V, V_{GS} = 0 V, f = 1.0 MHz		542		pF
Output Capacitance	C_{oss}	TEST CIRCUIT 7		132		pF
Reverse Transfer Capacitance	C_{rss}			91		pF
Turn-on Delay Time	$t_{d(on)}$	V_{DD} = 10 V, I_S = 6.0 A,		24		ns
Rise Time	t_r	V_{GS} = 4.0 V, R_G = 6.0 Ω,		165		ns
Turn-off Delay Time	$t_{d(off)}$	TEST CIRCUIT 8		160		ns
Fall Time	t_f			150		ns
Total Gate Charge	Q_G	V_{DD} = 16 V, V_{G1S1} = 4.0 V, I_S = 6.0 A, TEST CIRCUIT 9		8.6		nC
Body Diode Forward Voltage Note	$V_{F(S-S)}$	I_F = 6.0 A, V_{GS} = 0 V, TEST CIRCUIT 6		0.9		V

Note Pulsed

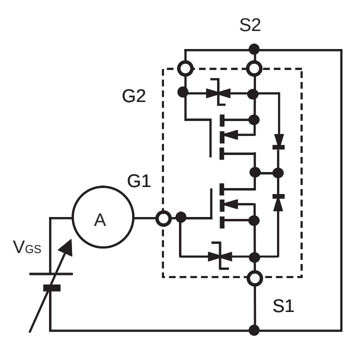
Test circuits are example of measuring the FET1 side.

TEST CIRCUIT 1 I_{SSS}



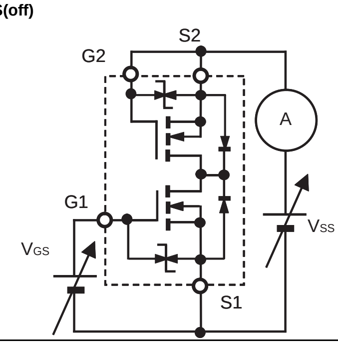
TEST CIRCUIT 2 I_{GSS}

When FET1 is measured, between GATE and SOURCE of FET2 are shorted.



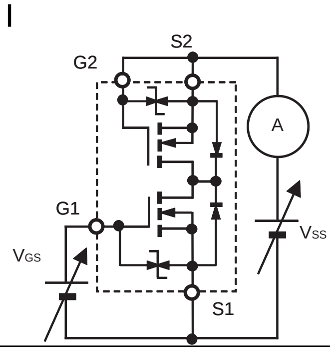
TEST CIRCUIT 3 $V_{GS(off)}$

When FET1 is measured, between GATE and SOURCE of FET2 are shorted.



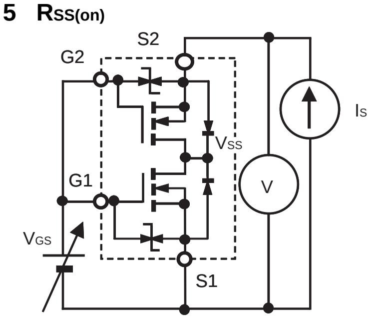
TEST CIRCUIT 4 $| y_{fs} |$

$\Delta I_S / \Delta V_{GS}$



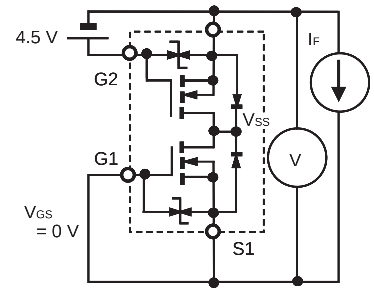
TEST CIRCUIT 5 $R_{SS(on)}$

V_{SS}/I_S

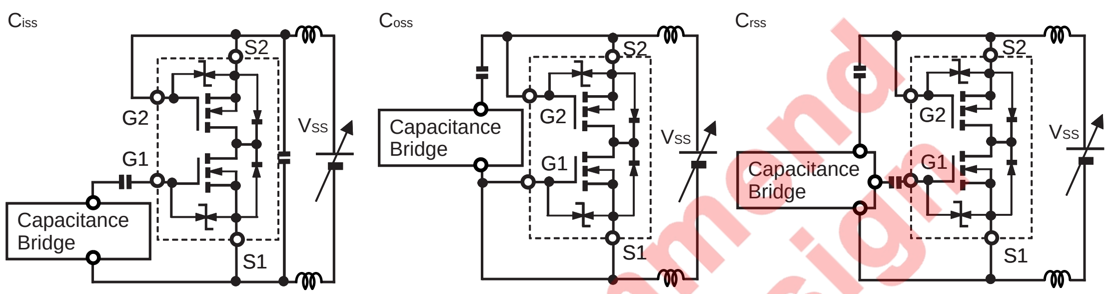


TEST CIRCUIT 6 $V_{F(S-S)}$

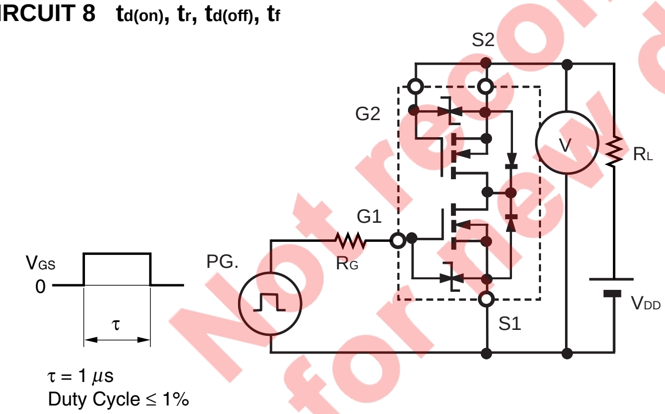
When FET1 is measured,
FET2 is added V_{GS} +4.5 V.

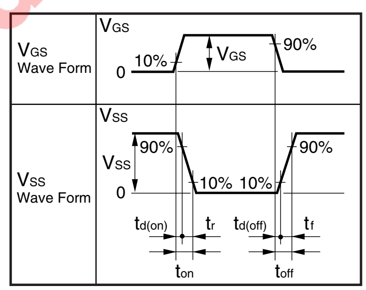


TEST CIRCUIT 7



TEST CIRCUIT 8 $t_{d(on)}$, t_r, $t_{d(off)}$, t_f





TEST CIRCUIT 9 Q_G

<Notes for using this device safely>

When you use this device, in order to prevent a customer's hazard and damage, use it with understanding the following contents. If used exceeding recommended conditions, there is a possibility of causing the device and characteristic degradation.

1. This device is very thin device and should be handled with caution for mechanical stress. The distortion applied to the device should become below 2000 × 10^{-6}. If the distortion exceeds 2000 × 10^{-6}, the characteristic of a device may be degraded and it may result in failure.

2. Please do not damage the device when you handle it. The use of metallic tweezers has the possibility of giving the wound. Mounting with the nozzle with clean point is recommended.

3. When you mount the device on a substrate, carry out within our recommended soldering conditions of infrared reflow. If mounted exceeding the conditions, the characteristic of a device may be degraded and it may result failure.

4. When you wash the device mounted the board, carry out within our recommended conditions. If washed exceeding the conditions, the characteristic of a device may be degraded and it may result in failure.

5. When you use ultrasonic wave to substrate after the device mounting, prevent from touching a resonance directly. If it touches, the characteristic of a device may be degraded and it may result in failure.

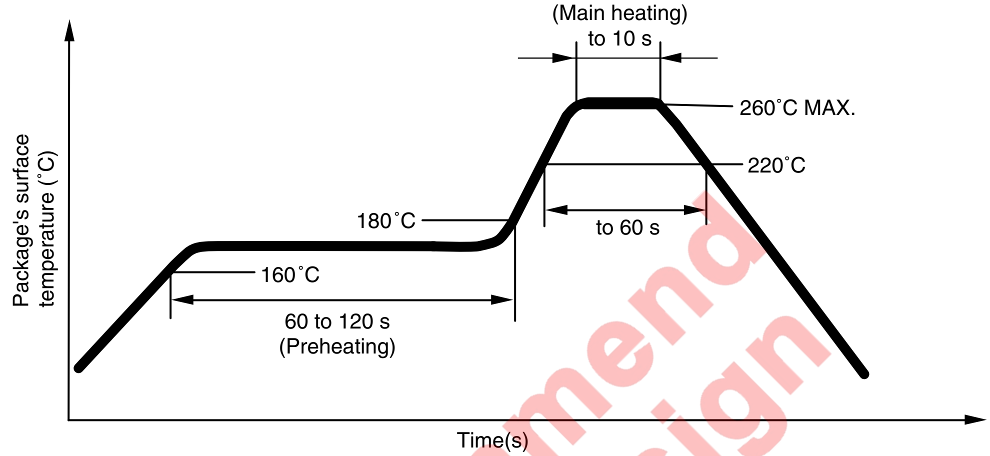
6. When you coat the device after mounted on the board, please consult our company. NEC Electronics recommends the epoxy resin of the semiconductor grade as a coating material.

7. Please refer to Figure 2 as an example of the Mounting Pad. Optimize the land pattern in consideration of density, appearance of solder fillets, common difference, etc in an actual design.

8. The marking side of this device is an internal electrode. Please neither contact with terminals of other parts nor take out the electrode.

Figure 1 Recommended soldering conditions of INFRARED REFLOW

Maximum temperature (Package's surface temperature)	: 260˚C or below
Time at maximum temperature	: 10 s or less
Time of temperature higher than 220˚C	: 60 s or less
Preheating time at 160 to 180˚C	: 60 to 120 s
Maximum number of reflow processes	: 3 times
Maximum chlorine content of rosin flux (Mass percentage)	: 0.2% or less



Infrared Reflow Temperature Profile
