

ROM number	
------------	--

**RENESAS ELECTRONICS
SINGLE-CHIP 16-BIT MICROCOMPUTER
R5F2LA86ADXXXFA
ROM PROGRAMMING CONFIRMATION FORM**

Receipt	Date:	
	Section mgr signature	PIC signature

Note: Please fill in all items marked *.

* Applicant	Company Name	TEL	Applicant signature	Submitted by
	Date issued	Year / Month / Date		

*** 1. Mask file**

Please kindly verify and confirm the mask file in the submitted CD-R prior to submission.
Please submit mask files on CD-R. And the number of the mask file must be 1 mask file per one CD-R.

Part Number R5F2LA86ADXXXFA

File Code

--	--	--	--	--	--	--	--

 (hexadecimal notation)

Mask file name

--	--	--	--	--	--	--	--

 .MSK (no more than 8 characters)

*** 2. Mask option**

Set the mask option in the mask file generating utility as follows:

Address : 10h Data : 01h

*** 3. ROM data which must be set by user**

Check the option function select registers (OFS, OFS2) and ID code areas to be set for appropriate values as ROM data.

OFS register OFS2 register ID code areas

CAUTION:

Note 1 : ROM order of this product programs the Data Flash area.

Note 2 : ROM data confirmation request

ROM programming will be processed based on the mask file generated by the mask file generating utility. Only in case when ROM data programmed in the actual mass produced product differs from that of above mentioned mask file, RENESAS takes the responsibility. There is no Engineering Sample, thus please confirm the ROM data at the receipt of the Initial product delivery.

Should you find any problem, please return immediately. 2 weeks without technical error feedback towards RENESAS will automatically be regarded as acceptance of products.

Note 3 : Mark specification

Please refer to Fig. 1 about mark specification.

yyy : ROM number XXXXXX : Lot number.

RENESAS ELECTRONICS SINGLE-CHIP 16-BIT MICROCOMPUTER R5F2LA86ADXXXFA

Usage conditions

For our reference of new products, please reply to the following questions about the usage of the products you ordered.

(1) What is the voltage of power supply (Vcc) you use?

Typ. = V

Min. = V

Max. = V

(2) What is the ambient temperature you use?

Typ. = °C

Min. = °C

Max. = °C

(3) On which condition will you use Reset? (Plural answers are possible.)

Hardware Reset

Power-on reset Reset

Voltage monitor 0 Reset

Watchdog timer Reset

Software Reset

(4) On which condition will you use Voltage monitor 0 Circuit?

Use

Not use

Voltage Detection 0 Level Select

3.80V

2.85V

2.35V

1.90V

(5) On which condition will you use Voltage monitor 1 Circuit?

Use

Not use

Voltage Detection 1 Level Select

2.20V

2.35V

2.50V

2.65V

2.80V

2.95V

3.10V

3.25V

3.40V

3.55V

3.70V

3.85V

4.00V

4.15V

4.30V

4.45V

(6) Will you use Voltage monitor 2 Circuit?

Use

Not use

(7) On which condition will you use High-speed clock?

High-Speed On-Chip Oscillator

Use

Not use

Frequency

20MHz

18.432MHz

Division ratio

Divide-by- mode

XIN-XOUT Oscillates

Use

Not use

External clock input

Oscillator type

Crystal Oscillator

Ceramic resonator

Others ()

Frequency

f(XIN) = MHz

Load capacity

XIN side = pF

XOUT side = pF

Internal feedback resistance

Use

Not use

Oscillation stop detection

Use

Not use

(8) On which condition will you use Low-speed clock?

Use

Not use

Low-speed on-chip oscillator

Oscillator type

Crystal Oscillator

Others ()

Frequency

f(XCIN) = kHz

Load capacity

XCIN side = pF

XCOUT side = pF

Internal feedback resistance

Use

Not use

RENESAS ELECTRONICS
SINGLE-CHIP 16-BIT MICROCOMPUTER
R5F2LA86ADXXXFA

(9) On which condition will you use System clock division ratio?

- No division mode Divide-by-2 mode Divide-by-4 mode
 Divide-by-8 mode Divide-by-16 mode

(10) Which Power control mode will you use? (Plural answers are possible.)

- Wait mode Stop mode
 Power-off 0 mode Power-off 2 mode

(11) Will you use Flash memory?

- CPU rewrite mode Use Not use
ROM code protect Use Not use

(12) Which timer mode will you use?

- Timer RB Use Not use
 Operation mode Timer mode Programmable one-shot generation mode
 Programmable waveform generation mode Programmable wait one-shot generation mode
 Count source f1 f2 f8 Timer RJ under flow

- Timer RC Use Not use
 Operation mode Timer mode Input capture function Output compare function
 PWM mode PWM2 mode
 Count source f1 f2 f4 f8 f32 fOCO20M
 fOCO-F TRCCLK

- Timer RH Use Not use
 Operation mode Output compare mode Real-time clock mode
 Count source f8 f32 f256 f512 f2048 f4096
 f8192 fc-TRH

- Timer RJ Use Not use
 Operation mode Timer mode Pulse output mode Event counter mode
 Pulse width measurement mode Pulse period measurement mode
 Count source f1 f2 f8 fOCO fC32 fC
 Timer RJ under flow

(13) On which condition will you use UART?

- UART0 Use Not use
 Operation mode Clock synchronous serial I/O mode Clock non-synchronous serial I/O mode

- UART2 Use Not use
 Operation mode Clock synchronous serial I/O mode Clock non-synchronous serial I/O mode
 I2C mode Multiprocessor communication function

- Synchronous Serial Communication Unit (SSU) Use Not use
 Operation mode Clock synchronous communication mode 4 lines bus communication mode

- I2C bus Interface Use Not use
 Operation mode I2C bus interface mode Clock synchronous serial mode

RENESAS ELECTRONICS
SINGLE-CHIP 16-BIT MICROCOMPUTER
R5F2LA86ADXXXFA

(18) On which condition will you use Watchdog Timer?

Use Not use

Count Source CPU clock Low-speed on-chip oscillator clock for the watchdog timer clock

Division ratio of the prescaler

1/2 1/16 1/128

Watchdog timer underflow period set bit

03FFh 0FFFh 1FFFh 3FFFh

Watchdog timer refresh acknowledgement period set bit

25% 50% 75% 100%

Watchdog timer start select bit

Watchdog timer automatically starts after reset

Watchdog timer is stopped after reset

Count source protection mode after reset select bit

Count source protection mode enabled after reset

Count source protection mode disabled after reset

Thank you for your cooperation.
