

# RZ Ecosystem Partner Solution

## TES Guiliani GUI Framework

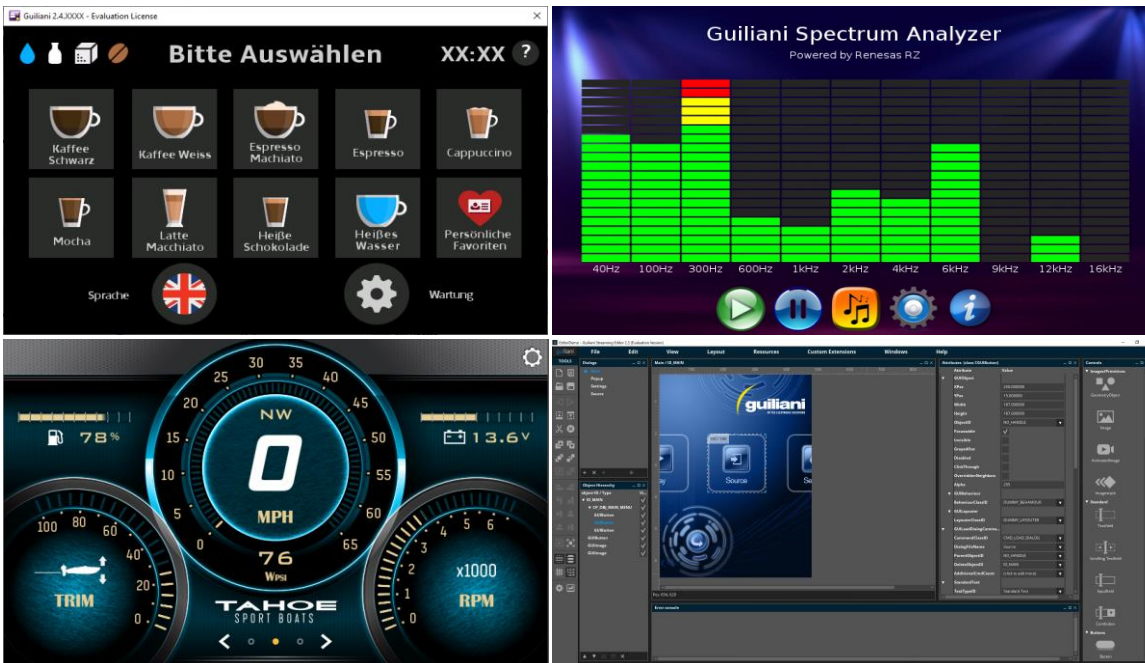

### Solution Summary

Guiliani is a modern and powerful C++ software for creating stylish Graphical User Interfaces (GUI) on a wide range of embedded hardware such as the [RZ/A family](#). It has a special strength in supporting teamwork, therefore helping to keep GUI projects on budget and on time.

### Features/Benefits

- Graphics Assets Streaming: Enables agile development, skins/themes and more...
- Powerful WYSIWYG Editor: Intuitive and user-friendly, even artists can use it easily.
- Scalable: Supports from bare-metal to Linux; and from MCU to MPU.
- Well Supported: Highest customer satisfaction ratings.
- Flexible Business Model: To match your business situation.

### Diagrams/Graphics

### Target Markets and Applications

- ALL embedded applications such as:
  - Appliances
  - Medical & Fitness
  - Industrial
  - Telecoms
  - Industrial
  - Wearable
  - Automotive & Transportation
  - Test & Measurement

- **TES is a Technology and Design Services Company** based in Germany with a global customer base.
- **90 employees, 90% engineers**
- **Embedded software, Graphics, RF such as radar and chip design including mixed signal, FPGA**
- **We Create – Design – Manufacture**
- **Close Renesas Electronics Partner for 20 years, in all imaginable applications...**
