The corporate governance of Renesas Electronics Corporation (hereinafter “Renesas” or the “Company”) is described below.

I. Basic Views on Corporate Governance, Capital Structure, Corporate Profile and Other Basic Information

1. Basic Views

Based on the following Corporate Governance Policy, the Renesas Group strives to be a company that is trusted by society by maintaining sound relationship with any and all stakeholders including local communities, customers and business partners in order to fulfill our social responsibility as a company.

【Corporate Governance Policy】

Based on our “Purpose”, “To Make Our Lives Easier”, we are committed to build a sustainable future where technology helps make our lives easier by developing a safer, healthier, greener, and smarter world to provide intelligence to our four focus growth segments: Automotive, Industrial, Infrastructure, and IoT. To achieve our Purpose, we aim to respond flexibly to changes, solve issues, and continue to create value in a sustainable way based on the “Renesas Culture”, a guideline of conduct for all of our activities, behavior and decision-making, which consists of five elements. Based on Renesas Culture, we aim for continuous growth and enhancement of corporate value over the mid- to long-term. In addition, we aim to co-exist and co-prosper with every stakeholder in order to create long-term sustainable value as a responsible global company. In order to achieve this, we must thrive in the rapidly-changing, competitive global semiconductor marketplace, and continue to satisfy the expectations of all of our stakeholders and to grow with profit expansions. We will continue to solidify our business foundation as a global semiconductor company by honing technological advancement as well as supplying excellent semiconductor products and optimized solutions through elaborate marketing and sales activities. We recognize the importance to build a corporate governance structure and system that enables transparent, fair, quick and resolute decision-making. We will remain committed to enhance and strengthen our corporate governance structure and system through various measures such as communication and cooperation with our stakeholders including shareholders, appropriate information disclosure, ensuring appropriate delegation of authority and highly effective oversight functions.

【Our Purpose】

To Make Our Lives Easier

At Renesas we continuously strive to drive innovation with a comprehensive portfolio of microcontrollers, analog and power devices. Our mission is to develop a safer, healthier, greener, and smarter world by providing intelligence to our four focus growth segments: Automotive, Industrial, Infrastructure, and IoT that are all vital to our daily lives, meaning our products and solutions are embedded everywhere.

【Renesas Culture】

Transparent

The leadership team's strategy and policy, the company's current situation, as well as the issues and thoughts of each business organization should be well understood among employees. This is also tightly connected to the "Agile" and "Entrepreneurial" elements described below, and we believe it is fundamental for the success of every individual and organization.

Agile

In order to respond to changes in a timely manner, it is necessary to identify the likely outcomes and implications as quickly as possible, make decisions quickly, and rapidly take or correct actions. We must recognize situations, make decisions and act at a high velocity. When a follow-up regarding a task is made from inside and outside the company, employees should understand they are not being "Agile".

Global

Not only the markets that we operate in, but also our customers and our competitors are global, and in order to thrive in this global environment, it is essential for us to have a global perspective. It is true we need better language skills, but there are many other simple steps we can take to facilitate communication, such as organizing discussion agenda, issues, alternative solutions in advance. In particular, numbers are useful as words. Whenever possible, use numbers and data to communicate, and try to share information more smoothly.

Innovative

In order for Renesas to provide "Innovative" technologies and products and continue to create sustainable social value, it is essential to practice "Innovative" way of conducting business and of thinking. Each and every one of our employees should embody "Innovation" using their imagination and creativity to improve their work and contribute to the realization of a better society.

Entrepreneurial

Individual employees should act professionally, voluntarily, and independently as if they are "running their own business" and are responsible for the results they deliver. Based on our strategies and policies as a company, we aim to develop employees who can think freely and create new value, without being constrained by existing concepts.

【Reasons for Non-compliance with the Principles of the Corporate Governance Code】

The Company complies with all principles of the Corporate Governance Code.

【Principle 1.4: Cross-Shareholdings

<Policies for Cross-Shareholdings>

The Company classifies investment shares into 2 categories, i.e., investment shares which the Company owns for pure investment purpose with expectation to receive profits from stock price fluctuations or dividends, and investment shares which the Company owns for the purpose other than pure investment. The Company will own investment shares for the purpose other than pure investment, only if the Company determines that it will contribute to improve the corporate value in terms of business alliances such as joint development or maintenance and strengthening of business relationships.

The Board of Directors of the Company verifies the rationality of continued holding itself and the number of holding shares comprehensively considering matters such as the purpose of holding each investment share, the transaction status and the financial status of the investee, and the return (including benefits gained by related businesses) and risks associated with holding such investment shares.

As of December 31, 2023, the Company owns 12 investment shares for purposes other than pure investment. Please also refer to our annual securities report posted on our website for details:

<<https://www.renesas.com/about/investor-relations/security>>

<Voting rights exercise standard of strategic investments>

The Company will exercise the voting rights for investment shares owned by the Company appropriately as a shareholder after verifying the investee companies' business policies and management strategies as well as their initiatives to improve mid to long term corporate value, from the perspective of sustainable growth of investee companies and improvement of the corporate values of both the Company and investee companies.

Fund concludes advisory contracts.

For the proper management of the Pension Fund, the Company implements various measures from both human resources and operation perspectives such as: appointment of the appropriate person with experience and abilities from the Company as an executive officer of the Pension Fund who is in charge of the fund management; and the attendance of the executive of the Finance Division at the Asset Management Committee hosted by the Pension Fund.

In addition, to prevent possible conflicts of interest between the beneficiaries of the Pension Fund and the Company, the Pension Fund entrusts the investment trustees with the decision to select investees and exercise voting rights on investees.

Outlines are as follows. Details of compensation will be determined by the Compensation Committee.

Compensation for Directors

Compensation for the Executive Officers and the Executive Corporate Officers

- Highly linked to company performance, and highly transparent and objective.
- Improvement of corporate value and compensation must interlock to share awareness of profit with shareholders.
- Contribute to ensuring and retaining global management team that satisfies accurate ability requirements to realize corporate vision

The Company intends to continue to update our executive compensation program in a manner consistent with global company practices, and the Company will strive to have our management team and shareholders recognize that our compensation program is suited to the market and supports a positive impact on our business performance.

<FY2023 Executive Compensation>

<Compensation for Directors (who do not concurrently serve as Executive Corporate Officers)>

Our basic policy regarding compensation for Directors who do not concurrently serve as Executive Corporate Officers shall be as follows:

Compensation for Directors who concurrently serve as Executive Corporate Officers shall be described in “Compensation for Executive Corporate Officers” below.

- Highly transparent and objective;
- Improvement of corporate value and compensation must interlock to share awareness of profit with shareholders; and
- Contribute to ensuring and retaining global management team that satisfies accurate ability requirements to realize corporate vision

Based on these basic policies, the Company pays base salary as fixed compensation and, for some of such Directors, in order to secure diverse and excellent human resources and to raise awareness further of their roles, RSU as stock based compensation subjected to duration of service conditions, up to the compensation limit (JPY2,000million/year, of which compensation for Outside Directors is up to JPY400M within the limitation) resolved at the Annual General Meeting of Shareholders on March 29, 2018 taking into consideration the decision of voluntary compensation committee is delegated the authority by the Board of Directors.

<Compensation for Executive Corporate Officers>

Our basic philosophy regarding compensation for Executive Corporate Officers (including Directors who concurrently serve as Executive Corporate Officers) is as follows:

- Highly linked to company performance, and highly transparent and objective;
- Improvement of corporate value and compensation must interlock to share awareness of profit with shareholders; and
- Contribute to ensuring and retaining global management team that satisfies accurate ability requirements to realize corporate vision.

<Compensation mix for Executive Corporate Officers >

- Base salary as fixed compensation
- Performance-linked compensation focused on achievement of nearer-term financial and strategic objectives (Short-term incentives)
- Stock based compensation as stock price-linked compensation, where management is motivated to increase shareholder value (Long-term incentives)

Performance evaluation criteria is set taking the factors/indicators such as the Company's financial situation and company value into account. Regarding the proportion of the compensation, based on basic policy, we set the ratio of stock-based compensation stock options to total compensation, and it is more than half of total compensation amount.

(Base salary)

Base salary is the core compensation that reflects the market value for particular roles and responsibilities in the organization. It is a reward for actual responsibilities, competencies, and experience of each Executive Corporate Officer.

Base salary is paid as a fixed amount based on scope of responsibilities and the expected contribution to the company. This is the fundamental component of executive compensation, and is set at a level that invites and ensures retention of competent officers, and motivates them to drive global business expansion.

Base salary will be adjusted annually considering market salary increase rates, company/Business Unit performance and individual performance.

(Performance-linked compensation (Short-term incentive (STI)))

Short-term incentive (STI) is offered to the officers in order to motivate and reward them for overall company financial results, as well as an assessment of the individual performance of Executive Corporate Officers each fiscal year. STI is an essential element of the executive compensation program and is focused on motivating Executive Corporate Officers to contribution to the performance objectives

for the company.

The STI program is based on one-year company performance, composed of performance of the Automotive solution Business Unit and the IoT and Infrastructure Business Unit, and evaluation is conducted using certain measures including the following to evaluate business expansion and its profitability.

- Revenue (growth rate)
- Operating margin

Evaluation measures and goals are set annually after review by the Compensation Committee, as well as the amounts of payment in response to business performance.

(Stock price-linked compensation (Long-term incentive (LTI))

Long-term incentive (LTI) refers to variable pay based on measures that extend for a period of more than one year, and typically align payouts with value results experienced by shareholders. The role of long-term incentives is to link financial incentives to Executive Corporate Officers with organization's long-term performance, and shareholder's long-term focus.

Our current long-term incentive is provided by RSU/PSU, and the actual profits received by Executive Corporate Officers are determined based on stock price growth, and/or 3-year total shareholders return (TSR).

Specifically, our stock compensation consists of PSU, where vests the units in a number determined in accordance with the extension rate of TSR and RSU with duration of service conditions. Of these, PSU is designed with our TSR as the performance measures in order to connect further to strengthening awareness and activities aimed at maximizing corporate value over the medium-to-long term and contributing to stock prices. The number of stock compensation units to be granted is determined based on the average closing price of the Company's share on the Tokyo Stock Exchange over the period of the 3 calendar months immediately prior to the calendar month in which the stock compensation is awarded by the Board of Directors, on the basis of the grant target amount set for each person according to their roles and responsibilities. The composition ratio of grant target amount for PSU and RSU is 50%: 50%.

[PSU]

- Grantees will be granted the number of units calculated by the following formula:
Number of Units = the PSU target grant value (prior to performance evaluation) / the average closing price of the Company's share on the Tokyo Stock Exchange over the period of the 3 calendar months immediately prior to the calendar month in which the stock compensation is awarded by the Board of Directors.
(*) the number of Units shall be rounded to the nearest 100 Units
- The performance period of PSU will be the three-year period from April 1 of the year in which the PSUs are granted (the "Performance Period"). PSUs shall vest on the vesting date (JST) which is, in principle, the 3rd anniversary of the date of grant, (as determined by the Company) by multiplying the number of the units subject to the PSU by the calculation ratio. The Company will issue a share for every unit that vests (the "Number of Shares for PSU") to the recipient.:

Performance Indicator:

TSR : It is determined by comparison with the companies which constitute SOX (Philadelphia Semiconductor Index), TOPIX (Tokyo Stock Price Index) and the peer companies that the

Company selects based on industry segment, scale of company, business model and so on (the Renesas Peers)

Performance Evaluation Period:

The performance period of PSUs will be the three-year period from April 1 of the year in which the PSUs are granted.

Growth rate of our TSR:

*1: Average stock price during the three-month period that ends on the last day of the Performance Period shall be the simple average price of the closing prices of the Shares on the Tokyo Stock Exchange during the last three-month period of the Performance Period.

*2: Average stock price during the three-month period that ends on the day immediately preceding the first day of the Performance Period shall be the simple average price of the closing prices of the Shares on the Tokyo Stock Exchange during the three-month period that ends on the day immediately preceding the first day of the Performance Period.

The way to determine the number of vesting of PSU:

The "TOPIX Calculation Ratio" means the classified percentage as set out in (i) through (v) below in accordance with the range to which the growth rate of the TSR of the Company belongs if the growth rate of the TSR of the Company and the growth rate of the TSR of the companies constituting the Tokyo Stock Price Index (the "TOPIX Constituent Companies") are classified in ascending order from the lowest TSR.

The "Renesas Peers Calculation Ratio" means the classified percentage as set out in (i) through (v) below in accordance with the range to which the growth rate of the TSR of the Company belongs if

the growth rate of the TSR of the Company and the growth rate of the TSR of the peer companies that the Company selects based on industry segment, scale of company, business model and so on (the "Renesas Peers") are classified in ascending order from the lowest TSR provided, however, that if the Company selects more than one categories of Renesas Peers, the Renesas Peers Calculation Ratio shall be the weighted average ratio obtained by calculating the Renesas Peers Calculation Ratio for each category of Renesas Peers and weighting such Renesas Peers Calculation Ratios by the ratio determined by the Company.

Under these circumstances, the Company has been working on various measures to enhance and strengthen its corporate governance system with the aim of realizing a monitoring model-type corporate governance system, which has become mainstream overseas. These measures include accelerating management of the Company by considering the main responsibilities of the Board of Directors as the supervision of the Company management's business execution and delegating appropriate authority, and promoting transparency of management of the Company.

In order for the Company to further develop as a global company in the semiconductor industry, which is expected to undergo increasingly rapid change and competition in the future, as a further step of these initiatives, the Company transitioned its structure from "a Company with a Board of Corporate Auditors" to "a Company with Nomination Committee, etc." with a resolution of 22nd Annual General Meeting of Shareholders

of the Company held on March 26, 2024.

This structure of a Company with Nomination Committee, etc., is designed as a monitoring model-type corporate governance system, which achieves both speedy and efficient management and also strengthens transparency and objectivity of management through clearly separating the Company's supervisory function from its executive function.

Specifically, the Board of Directors will specialize in supervising the execution of business by Executive Officers as well as deliberating and deciding on the Company's basic management policies, while promoting transparency and objectivity of management through the activities of three committees established under the umbrella of the Board of Directors (Nomination Committee, Compensation Committee and Audit Committee), the majority of whose members are Outside Directors. Delegating substantial authority over business execution to Executive Officers will enable acceleration and efficiency in management.

As described in "II-2. Matters on Functions of Business Execution, Auditing, Oversight, Nomination and Compensation Decisions (Overview of Current Corporate Governance System)", the Company believes this governance system is desirable for the Company, but we will continue to improve and enhance our corporate governance.

III. Implementation of Measures for Shareholders and Other Stakeholders

1. Measures to Vitalize the General Meeting of Shareholders and Facilitate Exercise of Voting Rights

	Supplementary Explanations
Early Posting of Notification of General Meeting of Shareholders	<p>The Company aims to deliver the convocation notice 3 weeks before the date of General Meeting of Shareholders.</p> <p>The date and notification date for the meeting for the past 5 General Meetings of Shareholder are as follows:</p> <p>Meeting Date / Notification Date (Early Disclosure Date in electrical manner)</p> <p>March 27, 2020 / March 6, 2020 (February 26, 2020)</p> <p>March 31, 2021 / March 10, 2021 (February 27, 2021)</p> <p>March 30, 2022 / March 11, 2022 (March 1, 2022)</p> <p>March 30, 2023 / March 10, 2023 (March 3, 2023)</p> <p>March 26, 2024 / March 7, 2024 (March 1, 2024)</p> <p>We will try to secure enough consideration time for shareholders' by means including early disclosure of the notice.</p>
Scheduling of the General Meeting of Shareholders on a Peak Day	<p>The Company held the 22nd Annual General Meeting of Shareholders on March 26, 2024. We aim to hold the General Meeting of Shareholders on a date when many shareholders can attend easily and avoid dates where many other companies hold general meetings of shareholders.</p>
Electronic Exercise of Voting Rights	<p>The Company uses a voting site through which shareholders can exercise voting rights using their own PC or mobile phone. In addition, from the 18th Annual General Meeting of Shareholders held on March 27, 2020, we introduced a way to easily exercise voting rights, i.e., exercise without filling in the exercise code and</p>

password by scanning QR code by smartphone.

In addition, the Company introduced a hybrid virtual shareholders meeting (attendance type) from the 19th Annual General Meeting of Shareholders held on March 31, 2021 and introduced a “General Meeting of Shareholders without designation of place”, or “virtual-only shareholders meeting” from the 21st Annual General Meeting of Shareholders held on March 30, 2023 to promote electronic exercise of voting rights. The reasons why the Company adopted a virtual-only shareholders meeting are as follows:

- (i) **Providing participation opportunities:** This method is expected to promote the exercise of shareholders’ voting rights and dialogue with shareholders at the General Meeting by minimizing any impact of location and time constraints as far as possible and providing all shareholders with equal opportunities to participate in the General Meeting. Also, as oral questions were introduced at the 22nd Annual General Meeting, shareholders may ask their questions both orally and by text, whichever is convenient for them.
- (ii) **Avoiding physical constraints:** This method can provide shareholders with opportunities to participate in the General Meeting without physical constraints, such as venue capacity, even under the Company’s recent circumstances where the number of its shareholders exceeds 100,000.
- (iii) **Reducing the burden on shareholders:** Attendance by shareholders with fewer physical or time constraints will contribute to revitalization, efficiency and facilitation of the General Meeting, and in turn, to the interests and convenience of our shareholders.
- (iv) **Equality among attendees:** By selecting a Virtual-Only Shareholders’ Meeting instead of a hybrid one, which tends to create a sense of inequality in terms of participation awareness between shareholders who attend the General Meeting in person and those who attend online, it is possible to operate the General Meeting in a more equal manner.
- (v) **Promoting dialogue with overseas officers:** As the Company has many overseas Directors and Executive Corporate Officers (*shikko yakuin*), it is appropriate to have overseas Directors and Executive Corporate Officers participate in the General Meeting in the same manner as other Directors and officers, and provide answers to shareholders’ questions, from the perspective of promoting dialogue with shareholders.
