An MCU Unit--R0E535M00MCU00-- for the E100 Emulator Released

We have released an MCU Unit--R0E535M00MCU00--for the E100 emulator (specific to the M16C/50 MCU series).

1. Outline of Product

The R0E535M00MCU00 is an MCU unit used for debugging systems designed with MCUs of the M16C/5M, M16C/5L, M16C/56, M16C/5LD, and M16C/56D groups, M16C/50 series in combination with the E100 emulator.

For details of the product, go to:

<http://www.renesas.com/e100/r0e535m00mcu00>

And for information about the E100 emulator, go to:

<http://www.renesas.com/e100>

To debug your systems, you need to use the optional converter board for connecting the target system with the MCU unit's flexible cable.

The product type of the converter board to use is dependent on the MCU in your system. For information about the converter boards involved, visit:

http://www.renesas.com/e100_m16cf_eo

This Web page will be opened from September 24 on.

The above URLs are our global sites.

2. Contents of Product Package

- (1) An MCU unit R0E535M00MCU00
- (2) A flexible cable (already connected with the MCU unit)
- (3) A 20-MHz oscillator module (already mounted on the MCU unit)
- (4) A CD-ROM containing M16C R8C E100 Emulator Software V.1.02 Release 01

3. How to Purchase Product

When you place an order for the product, supply the following items of information to your local Renesas Technology sales office or distributor:

Product type: R0E535M00MCU00

Type name: As above

For the price of the product, also contact the above sales office or distributor.

4. Free-of-Charge Upgrade of WS Products (Working Samples)

We are upgrading WS products of the MCU unit to the equivalent of the commercial product free of charge. The serial numbers of the WS products involved are as follows:

Serial Nos.: 9CI0001 through 9CI0030

Serial numbers are inscribed on the label affixed to the product's board or the flexible cable.

We are going to start accepting the application for upgrading WS products in January 2010 and will inform you of the details in RENESAS TOOL NEWS.

Since the above WS products are not different from the commercial ones in any items of functionality, use them as before until upgraded.

We have revised M16C R8C E100 Emulator Software from V.1.02 Release 00 to V.1.02 Release 01. For the way of the update, see RENESAS TOOL NEWS Document No. 090916/tn4.
