

ISL73841SEH

Radiation Tolerant 30V 32-Channel Analog Multiplexer

The [ISL73841SEH](#) is a radiation tolerant, 32-channel high ESD protected multiplexer fabricated using the proprietary Renesas P6SOI (Silicon On Insulator) process technology. It operates with a dual supply voltage ranging from $\pm 10.8V$ to $\pm 16.5V$. It has a 5-bit address plus an enable pin that can be driven with adjustable logic thresholds to conveniently select one of 32 available channels. An inactive channel is separated from an active channel by a high impedance, which inhibits any interaction between the channels.

The ISL73841SEH low r_{ON} allows for improved signal integrity and reduced power losses. The ISL73841SEH is also designed for cold sparing, making it excellent for high reliability applications that have redundancy requirements. It is designed to provide a high impedance to the analog source in a powered off condition, making it easy to add additional backup devices without loading signal sources. The ISL73841SEH also incorporates input analog overvoltage protection, which disables the switch to protect downstream devices.

The ISL73841SEH is available in a 48 Ld CQFP or die form and operates across the extended temperature range of $-55^{\circ}C$ to $+125^{\circ}C$.

A 16-channel version in a 28 Ld CDFP is also available. Refer to the [ISL73840SEH](#) datasheet for more information. For a list of differences between the ISL73841SEH and ISL73840SEH, refer to [Table 1 on page 3](#).

Features

- DLA SMD #[5962-15220](#)
- Fabricated using P6SOI process technology
- ESD protection 8kV (HBM)
- Rail-to-rail operation
- Overvoltage protection
- Low r_{ON} <500 Ω (typical)
- Flexible split rail operation
 - Positive supply above GND (V^+) +10.8V to +16.5V
 - Negative supply below GND (V^-) -10.8V to -16.5V
- Adjustable logic threshold control with VREF pin
- Cold sparing capable (from ground)..... $\pm 25V$
- Analog overvoltage range (from ground)..... $\pm 35V$
- Off switch leakage 100nA (maximum)
- Transition times (t_R , t_F) 500ns (typical)
- Break-before-make switching
- Grounded metal lid (internally connected)
- Operating temperature range..... $-55^{\circ}C$ to $+125^{\circ}C$
- Radiation tolerance
 - Low dose rate (0.01rad(Si)/s) 50krad(Si) ([Note 1](#))
 - SEB LET_{TH} 86.4MeV • cm²/mg

NOTE:

1. Product capability established by initial characterization. All subsequent lots are assurance tested to 50krad (0.01rad(Si)/s) wafer-by-wafer.

Ordering Information

ORDERING NUMBER (Note 3)	PART NUMBER (Note 2)	RADIATION HARDNESS (Total Ionizing Dose)	PACKAGE DESCRIPTION (RoHS Compliant)	PKG. DWG. #	TEMP RANGE
5962L1522002VXC	ISL73841SEHVF	LDR to 50krad(Si)	48 LD CQFP Packaged Device	R48.A	-55 to +125 °C
N/A	ISL73841SEHF/PROTO (Note 5)	N/A			
5962L1522002V9A	ISL73841SEHVX (Note 4)	LDR to 50krad(Si)	Bare Die	N/A	
N/A	ISL73841SEHX/SAMPLE (Notes 4, 5)	N/A			

NOTES:

- These Pb-free Hermetic packaged products employ 100% Au plate - e4 termination finish, which is RoHS compliant and compatible with both SnPb and Pb-free soldering operations.
- Specifications for Rad Hard QML devices are controlled by the Defense Logistics Agency Land and Maritime (DLA). The SMD numbers listed must be used when ordering.
- Die product tested at $T_A = +25^\circ\text{C}$. The wafer probe test includes functional and parametric testing sufficient to make the die capable of meeting the electrical performance outlined in "[Electrical Specifications \(+15V\)](#)" and "[Electrical Specifications \(+12V\)](#)".
- The /PROTO and /SAMPLE are not rated or certified for Total Ionizing Dose (TID) or Single Event Effect (SEE) immunity. These parts are intended for engineering evaluation purposes only. The /PROTO parts meet the electrical limits and conditions across temperature specified in the DLA SMD and are in the same form and fit as the qualified device. The /SAMPLE parts are capable of meeting the electrical limits and conditions specified in the DLA SMD. The /SAMPLE parts do not receive 100% screening across temperature to the DLA SMD electrical limits. These part types do not come with a Certificate of Conformance because they are not DLA qualified devices.

TABLE 1. TABLE OF DIFFERENCES

SPECIFICATION	ISL73841SEH	ISL73840SEH
Number of Channels	32	16
Supply Current (I+/I-)	400 μ A (maximum)	350 μ A (maximum)
Output Leakage (+125 °C)	120nA (maximum)	60nA (maximum)

Pin Configuration

Pin Descriptions

PIN NAME	PIN NUMBER	DESCRIPTION
NC	2, 26, 27, 47, 48	Not connected, no internal connection.
OUT	1	Output for multiplexer (see Circuit 1 in Figure 3)
V+	19	Positive power supply (see Circuit 3 in Figure 3)
V-	30	Negative power supply (see Circuit 4 in Figure 3)
INx	3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46	Inputs for multiplexer (see Circuit 2 in Figure 3)
Ax	21, 22, 23, 24, 25	Address lines for multiplexer (see Circuit 3 in Figure 3)
$\overline{\text{EN}}$	28	Enable control for multiplexer (active low, see Circuit 3 in Figure 3)
VREF	20	Reference voltage used to set logic thresholds (see Circuit 3 in Figure 3)
GND	29	Ground
LID	-	Package Lid is internally connected to GND (Pin 29)

Absolute Maximum Ratings

Positive Supply Voltage above GND (V^+) (Note 8)	+20V
Negative Supply Voltage below GND (V^-) (Note 8)	-20V
Maximum Supply Voltage Differential (V^+ to V^-) (Note 8)	40V
Analog Input Voltage (INx)	
From GND (Note 8)	$\pm 35V$
Digital Input Voltage Range (\overline{EN} , Ax)	GND - 0.3V to +16.5V
VREF to GND (Note 8)	+16.5V
ESD Tolerance	
Human Body Model (Tested per MIL-STD-883 TM 3015)	8kV
Charged Device Model (Tested per JESD22-C101D)	250V
Machine Model (Tested per JESD22-A115-A)	250V

Thermal Information

Thermal Resistance (Typical)	θ_{JA} ($^{\circ}C/W$)	θ_{JC} ($^{\circ}C/W$)
48 Ld CQFP (Notes 6, 7)	50	2
Storage Temperature Range	-65 $^{\circ}C$ to +150 $^{\circ}C$	

Recommended Operating Conditions

Ambient Operating Temperature Range	-55 $^{\circ}C$ to +125 $^{\circ}C$
Maximum Operating Junction Temperature	+150 $^{\circ}C$
Positive Supply Voltage Above GND (V^+)	+10.8V to +16.5V
Negative Supply Voltage Below GND (V^-)	-10.8V to -16.5V
Supply Voltage Differential (V^+ to V^-)	21.6V to 33V
VREF to GND	4.5V to 5.5V

CAUTION: Do not operate at or near the maximum ratings listed for extended periods of time. Exposure to such conditions may adversely impact product reliability and result in failures not covered by warranty.

NOTES:

- θ_{JA} is measured with the component mounted on a high-effective thermal conductivity test board in free air. Refer to [TB379](#) for details.
- For θ_{JC} , the "case temp" location is the center of the package underside.
- Tested in a heavy ion environment at LET = 86.3MeV • cm²/mg at +125 $^{\circ}C$.

Electrical Specifications ($\pm 15V$) $V^+ = 15V$, $V^- = -15V$, $V_{AH} = 4.0V$, $V_{AL} = 0.8V$, $V_{REF} = V_{\overline{EN}} = 5.0V$, $T_A = +25^{\circ}C$, unless otherwise noted. **Boldface limits apply across the operating temperature range, -55 $^{\circ}C$ to +125 $^{\circ}C$ or across a total ionizing dose of 50krad(Si) with exposure at a low dose rate of <10mrad(Si)/s.**

Applications Information

Power-Up Considerations

The circuit is designed to be insensitive to any given power-up sequence between V^+ , V^- , and V_{REF} ; however, it is recommended that all supplies power-up relatively close to each other.

Overvoltage Protection

The ISL73841SEH has overvoltage protection on both the input and the output. On the output, the voltage is limited to a diode past the rails. Each of the inputs has independent overvoltage protection that works regardless of the switch being selected. If a switch experiences an overvoltage condition (3V to 4V past the rail), the switch is turned off. As soon as the voltage returns within the rails, the switch returns to normal operation.

V_{REF} and Logic Functionality

The V_{REF} pin sets the logic threshold for the ISL73841SEH. The range for V_{REF} is between 4.5V and 5.5V with a nominal voltage of 5V. The address pins and enable are compared against roughly 30% of V_{REF} voltage (refer to Figure 56). With 5.0V on V_{REF} , the switching point is set to around 1.4V. This switching point allows for both 5V and 3.3V logic control.

FIGURE 56. SIMPLIFIED V_{REF} CIRCUITRY

Considerations for Redundant Applications

When using the ISL73841SEH in a cold sparing application, it is recommended to keep the ground pin connected to system ground at all times. All supply pins (V^+ , V^- , and V_{REF}) should either be grounded or floating together.

If the supply pins are floating, it is recommended to place a high value bleed resistor ($\sim 1M\Omega$) in parallel with the decoupling caps on each supply pin to ensure that the supply voltage is discharged in a predictable manner. Figures 57 and 58 illustrate the recommended cold sparing setup for both shorted and floating supplies.

FIGURE 57. COLD SPARING SETUP WITH SUPPLIES SHORTED

FIGURE 58. COLD SPARING SETUP WITH SUPPLIES FLOATING

ISL73841SEH vs ISL73840SEH

The ISL73840SEH, a 16-channel version of the ISL73841SEH, is available in a 28 Ld CDFP. The parts' performance specifications are very similar. Apart from the apparent increase in channel density, the ISL73841SEH has slightly higher output leakage compared to the ISL73840SEH because it has more channels connected to the output. The supply current for the ISL73841SEH is also slightly higher compared to the ISL73840SE. Refer to [Table 1 on page 3](#) for a comparison of the two devices.

Revision History The revision history provided is for informational purposes only and is believed to be accurate, but not warranted. Please visit our website to make sure you have the latest revision.

DATE	REVISION	CHANGE
Aug 10, 2023	4.00	<p>Removed Related Literature section. Updated Ordering Information table and notes. In ABS MAX RATINGS Section on page 5, changed Digital Input Voltage Range (\overline{EN}, Ax) from "GND to V+" to "GND - 0.3V to +16.5V". Updates to the Electrical Specifications ($\pm 15\text{V}$) table are as follows:</p> <ul style="list-style-type: none"> On page 5, for parameters Channel On-Resistance, r_{ON} Match Between Channels, and ON-Resistance Flatness added $V_{\overline{EN}} = 0\text{V}$ to the Test Conditions. On page 6, for parameter Switch Off Leakage with Device Powered OFF changed it to Switch Off Leakage with Device Powered OPEN. On page 6, added new parameter Switch On Leakage Current into the Drain (Overvoltage) specifications. On page 6, for parameter Switch On Leakage Current into the Source (Overvoltage) update the limits values and units to μA. On page 6, for parameter Switch Off Leakage Current into the Source (Overvoltage) added a new $T_A = -55^\circ\text{C}$ specification. On page 7, for parameter Switch On Leakage Current into the Source/Drain added $V_{\overline{EN}} = 0\text{V}$ to the Test Conditions. Changed the I+, I- Quiescent & Standby Supply Current parameters to $V_{\text{REF}} = 5.5\text{V}$, $V_{\text{IN}} = 0\text{V}$, $V_A = 0.8\text{V}$. Changed parameter nomenclature for Supply Current Into V_{REF} to Quiescent Supply Current Into V_{REF}. Added new specification parameter Standby Current Into V_{REF}. <p>Updates to the Electrical Specifications ($\pm 12\text{V}$) table on page 8 are as follows:</p> <ul style="list-style-type: none"> On page 8, for parameters Channel On-Resistance, r_{ON} Match Between Channels, and ON-Resistance Flatness added $V_{\overline{EN}} = 0\text{V}$ to the Test Conditions. Changed the I+, I- Quiescent & Standby Supply Current parameters to $V_{\text{REF}} = 5.5\text{V}$, $V_{\text{IN}} = 0\text{V}$, $V_A = 0.8\text{V}$. Changed parameter nomenclature for Supply Current Into V_{REF} to Quiescent Supply Current Into V_{REF}. Added new specification parameter Standby Current Into V_{REF}.
Feb 23, 2018	3.00	<p>Added "Considerations for Redundant Applications" section on page 19. Removed About Intersil section and added Renesas disclaimer.</p>
Dec 7, 2017	2.00	<p>Added Related Literature section on page 1 Added Note 4 to Ordering Information on page 3 Added ESD circuit images in Figure 3 on page 4</p>
May 31, 2016	1.00	<p>Added SMD in Features Updated Ordering Information table on page 3 Updated header in 1st and 2nd columns of "Electrical Specifications ($\pm 15\text{V}$)" on page 5 and "Electrical Specifications ($\pm 12\text{V}$)" on page 8 from "Parameter" and "Description" to "Symbol" and "Parameter"</p>
May 13, 2016	0.00	Initial release
