Date: September 16, 2011

September 16, 2011

To: Our Valued Intersil Customers

Subject: **Packing Method Change for Intersil 8-pin Ceramic Solder Seal Dual-In-Line (SBDIP) Packaged Products**

This advisory is to inform you that Intersil is changing the packing method for the listed Intersil 8-pin Ceramic Solder Seal Dual-In-Line (SBDIP) packaged products. Intersil will discontinue packing in bulk (multiple units in foam loaded in foil-lined box) or tubes and implement packing in anti-static trays with lids. Implementation of tray packing is planned to begin in October 2011.

Products affected:

This transition to the tray packing method will eliminate the use of undesirable packing materials (pink poly foam) and reduce the potential for damage to product during shipment to customers. The industry standard trays are made of an anti-static material. Dimensional information and photographs are included for reference. The basic tray information is as follows:

Package		Tray Dimensions			Quantity Per Tray
Type	Size	Length	Width	Height	
SBDIP	8 Pin	7.75	7.25	0.50	100

Note: Dimensions are approximate and the unit of measure is inches.

Intersil will take all necessary actions to conform to agreed upon customer requirements and to ensure the continued high quality and reliability of Intersil products. Customers may expect to receive shipments of 8-pin SBDIP product packed in anti-static trays beginning in October 2011 or upon depletion of existing inventory.

If you have concerns with this advisory, Intersil must hear from you promptly. Please contact the nearest Intersil Sales Office or call the Intersil Corporate line at 1-888-468-3774, in the United States, or 1-321-724-7143 outside of the United States.

Regards,

Jon Brewster
