Ubiquitous AI Corporation

RZ Ecosystem Partner Solution
# Ubiquitous DeviceSQL

Solution Summary

Ubiquitous DeviceSQL is specially designed for embedded devices and is based on the world's smallest stream-based data management technologies. (Memory footprint: Min 50KB), This is a framework product that realizes data management functions optimized for Renesas RZ family.

Features/Benefits

- An ultra high-speed, ultra compact database
- Advanced approach from the DeviceSQL Language based on PL/SQL to the C language
- Achieving optimal data placement
- Portability to support any CPU and OS

Block Diagrams/Graphics

Target Market and Applications

- Consumer Electronics
- Automotive
- Industrial
- MFP/Printer
- Healthcare
- Smart Home
- Home Appliance
- IoT Devices
