

# RL78/G13 GUIDE FOR ENGINEER

24<sup>TH</sup>, JUL. 2024

EP2P-AA-24-0330 REV.1.00

EMBEDDED PROCESSING 2ND BUSINESS DIVISION  
EMBEDDED PROCESSING PRODUCT GROUP  
RENESAS ELECTRONICS CORPORATION

The information/materials required at the time of product development summarized and listed for each development phase. Application notes are a list of regrouped by contents.  
Please use it as a guidebook when developing.

# CONTENT

---

We summarized and listed up various information and materials required at the time of product development by each development phase.

Also, You can select what you need for your application from our rich selection of application notes that describing how to use a peripheral punction, example applications, how to create a program, and more.

Please use these information, materials and application notes as a guidebook when developing.

List of information and materials required for product development

- [Step1: MCU selection](#)
- [Step2: Designing and evaluating](#)
- [Step3: Mass production](#)

[List of application notes](#)

# STEP1 MCU SELECTION

# RL78/G13 APPLICATION NOTE

SUPPLEMENTARY INFORMATION: PLEASE REFER TO THE APPLICATION NOTE LIST AS NECESSARY.

#	Main items	Overview
1	<a href="#">Basic</a>	Hardware Design/Clock/Voltage/Memory
2	<a href="#">Peripheral</a>	MCU peripheral function
3	<a href="#">Safety</a>	Safety function
4	<a href="#">Self programming</a>	Flash writing
5	<a href="#">Security / Crypto</a>	Security/Crypto
6	<a href="#">Connectivity</a>	Wireless of Wi-Fi , Wired of Modbus ASCII/RTU
7	<a href="#">DALI</a>	DALI solution
8	<a href="#">Flash program</a>	Flash programming
9	<a href="#">Memory Driver</a>	Memory driver
10	<a href="#">File System</a>	FAT file system
11	<a href="#">Sound</a>	ADPCM
12	<a href="#">Sensor</a>	Sensor
13	<a href="#">Reality AI</a>	Reality AI
14	<a href="#">Software relation</a>	Software
15	<a href="#">Others</a>	Other

# RL78/G13 APPLICATION NOTE [BASIC(1/3)]

Item	Title	Summary	Sample code
1	<a href="#">RL78 Bootloader - One Image (R11AN0470EU0100)</a>	This example project was created to simplify the understanding and creation of bootloader programs on the RL78. The RL78 has a unique flash interface called the Flash Self-programming Library (FSP). This example project shows the use of the FSP along with hardware features such as boot swap and the general hardware CRC.	-
2	<a href="#">RL78 Family RL78 Hardware CRC Functions</a>	Many applications need to check the integrity of a code image or data communication stream by using a CRC function to verify data errors have not occurred.	<a href="#">Download</a>
3	<a href="#">RL78/G13 Initialization [for CubeSuite+, IAR, and e2studio]</a>	This application note describes the basic setting items that are necessary for initializing the RL78/G13. The sample program discussed in this application note initializes the RL78/G13 and provides on/off control of three LEDs according to the combination of two switch input states.	<a href="#">Download</a>
4	<a href="#">RL78/G13 Initialization CC-RL</a>	This application note describes the basic setting items that are necessary for initializing the RL78/G13. The sample program discussed in this application note initializes the RL78/G13 and provides on/off control of three LEDs according to the combination of two switch input states.	<a href="#">Download</a>
5	<a href="#">RL78/G13 CPU Clock Changing and Standby Settings (C Language) CC-RL</a>	This application note describes how to change the RL78/G13's CPU clock and set it to standby (changing operation modes)	<a href="#">Download</a>
6	<a href="#">RL78/G13 CPU Clock Changing and Standby Settings (Assembly) CC-RL</a>	This application note describes how to change the RL78/G13's CPU clock and set it to standby (changing operation modes)	<a href="#">Download</a>
7	<a href="#">RL78/G13 High-speed On-chip Oscillator (HOCO) Clock Frequency Correction</a>	This application note explains how to correct the oscillation clock frequency of the high-speed on-chip oscillator (HOCO) by using the high-speed on-chip oscillator trimming register (HIOTRM) incorporated in RL78/G13.	<a href="#">Download</a>
8	<a href="#">RL78/G13 High-speed On-chip Oscillator (HOCO) Clock Frequency Correction CC-RL</a>	This application note explains how to correct the oscillation clock frequency of the high-speed on-chip oscillator (HOCO) by using the high-speed on-chip oscillator trimming register (HIOTRM) incorporated in RL78/G13.	<a href="#">Download</a>
9	<a href="#">RL78/G13 High-speed On-chip Oscillator (HOCO) Clock Frequency Correction for Cubesuite+ and IAR Toolchain</a>	This application note explains how to correct the oscillation clock frequency of the high-speed on-chip oscillator (HOCO) by using the high-speed on-chip oscillator trimming register (HIOTRM) incorporated in RL78/G13.	<a href="#">Download</a>
10	<a href="#">RL78/G13 High-speed On-chip Oscillator (HOCO) Clock Frequency Correction for GNURL78 v13.01 Toolchain</a>	This application note explains how to correct the oscillation clock frequency of the high-speed on-chip oscillator (HOCO) by using the high-speed on-chip oscillator trimming register (HIOTRM) incorporated in RL78/G13.	<a href="#">Download</a>

# RL78/G13 APPLICATION NOTE [BASIC(2/3)]

Item	Title	Summary	Sample code
11	<a href="#">RL78/G13 Clock Generator (Clock Switching)</a>	This application note explains how to use the clock generator of the RL78/G13.	<a href="#">Download</a>
12	<a href="#">RL78/G13 Clock Generator (Clock Switching) CC-RL</a>	This application note explains how to use the clock generator of the RL78/G13.	<a href="#">Download</a>
13	<a href="#">RL78 Family RL78 Internal Temperature Sensor Calibration (Using IAR Toolchain)</a>	The following document describes a method to improve the internal temperature sensor accuracy of the RL78 MCU by performing a calibration.	<a href="#">Download</a>
14	<a href="#">RL78 Family RL78 Low Power MCU</a>	The purpose of this application note is to show prospective users the advantages of the new Renesas RL78 low power 16bit MCU family over the major 8/16/32 low power MCU competitors, and how to utilize key RL78 low power features	-
15	<a href="#">Current Consumption Tuning Solution (E2 Emulator, e2 studio)</a>	This application note introduces the current consumption tuning solution using the E2 emulator.	-
16	<a href="#">Current Consumption Tuning Solution(E2 Emulator, CS+)</a>	This application note introduces the current consumption tuning solution using the E2 emulator.	-
17	<a href="#">RL78/G13 Measurement of Standby Mode Supply Current CC-RL</a>	This application note describes the method for measuring the supply current of the RL78/G13 in the STOP mode or the HALT mode.	<a href="#">Download</a>
18	<a href="#">RL78/G13 Low-power Consumption Operation</a>	This application note describes general methods of reducing power consumption and methods of setting the low-power consumption functions of the RL78/G13.	<a href="#">Download</a>
19	<a href="#">RL78/G13 Low-power Consumption Operation CC-RL</a>	This application note describes general methods of reducing power consumption and methods of setting the low-power consumption functions of the RL78/G13.	<a href="#">Download</a>
20	<a href="#">RL78G13 Utilising the Snooze Mode Sample Code</a>	The purpose of this Application Note is to show the user how to add the associated RL78/G13 sample code to a new or existing CubeSuite+ workspace; as well as give an explanation of what the sample code does.	<a href="#">Download</a>

[Return to the list of main items in the application note](#)

# RL78/G13 APPLICATION NOTE [BASIC(3/3)]

# RL78/G13 APPLICATION NOTE [SELF PROGRAMMING(1/2)]

Item	Title	Summary	Sample code
1	<a href="#">RL78 Family Flash Self Programming Library Type01 User's Manual in Japan and Other Asian Countries (Japanese Release)</a>	The flash self-programming library is software to rewrite data in the code flash memory with the firmware installed on the RL78 microcontroller.	-
2	<a href="#">RL78/G13 Flash Self Programming: Execution</a>	This application note is intended for users who have a basic understanding of the functions of the Type 01 Flash Self Programming Library for the RL78/G13 microcontrollers and who are to design application systems using that library.	<a href="#">Download</a>
3	<a href="#">Flash Self-programming Library Type T01, European Release</a>	The Flash Self-programming library for IAR V2.xx development environments (except linker sample file) can also be used with the IAR V3.xx or later version development environments.	-
4	<a href="#">RL78/G13 Self-Programming (Received Data via CSI) CC-RL</a>	This application note gives the outline of flash memory reprogramming using a self-programming technique. In this application note, flash memory is reprogrammed using the flash memory self-programming library Type01.	<a href="#">Download</a>
5	<a href="#">RL78/G13 Self-Programming (Received Data via CSI)</a>	This application note gives the outline of flash memory reprogramming using a self-programming technique. In this application note, flash memory is reprogrammed using the flash memory self-programming library Type01.	<a href="#">Download</a>
6	<a href="#">RL78/G13 Self-Programming (Received Data via UART) CC-RL</a>	This application note gives the outline of flash memory reprogramming using a self-programming technique. In this application note, flash memory is reprogrammed using the flash self-programming library Type01.	<a href="#">Download</a>
7	<a href="#">RL78/G13 Self-Programming (Received Data via UART)</a>	This application note gives the outline of flash memory reprogramming using a self-programming technique. In this application note, flash memory is reprogrammed using the flash memory self-programming library Type01.	<a href="#">Download</a>
8	<a href="#">RL78/G13 Self-Programming (Received Data via IIC) CC-RL</a>	This application note gives the outline of flash memory reprogramming using a self-programming technique. In this application note, flash memory is reprogrammed using the flash memory self-programming library Type01. The reprogramming data is received via IIC.	<a href="#">Download</a>
9	<a href="#">RL78/G13 Self-Programming (Received Data via IIC)</a>	This application note gives the outline of flash memory reprogramming using a self-programming technique. In this application note, flash memory is reprogrammed using the flash memory self-programming library Type01. The reprogramming data is received via IIC.	<a href="#">Download</a>
10	<a href="#">RL78 Family Data Flash Library Type04 User's Manual in Japan and Other Asian Countries (Japanese Release)</a>	The data flash library is a software library to perform operations to the data flash memory with the firmware installed on the RL78 microcontroller.	-
11	<a href="#">RL78/G13 Flash Data Library Type04</a>	This application note explains how to writes and reads data to and from data flash memory using the Flash Data Library Type04 (flash data library).	<a href="#">Download</a>

[Return to the list of main items in the application note](#)

# RL78/G13 APPLICATION NOTE [SELF PROGRAMMING(2/2)]

Item	Title	Summary	Sample code
12	<a href="#">RL78/G13 Data Flash Library Type04 CC-RL</a>	This application note explains how to writes and reads data to and from data flash memory using the Flash Data Library Type04 (flash data library).	<a href="#">Download</a>
13	<a href="#">Data Flash Access Library Type T04 (Pico), European Release</a>	A Data Flash Library (FDL) is a software library to perform operations on the data flash memory on the RL78 microcontroller.	-
14	<a href="#">Data Flash Access Library FDL-T01 RL78 Series, European Release</a>	This user's manual describes the overall structure, functionality and software interfaces (API) of the Data Flash Library (FDL) accessing the physical Data Flash separated and independent from the Code Flash. This library supports dual operation mode where the content of the Data Flash is accessible (read, write, erase) during instruction code execution.	-
15	<a href="#">Data FLASH Converter (Data FLASH memory image generation)</a>	The Data FLASH Converter is a windows based tool that generates a Data FLASH memory image from EEPROM emulation data and/or from a program code file that is mapped to the Data FLASH area of a Renesas microcontroller.	-
16	<a href="#">EEPROM Emulation Software RL78 Type 01 User's Manual for RL78/G2x</a>	EEPROM emulation is a feature used to store data in the on-board flash memory in the same way as EEPROM. In EEPROM emulation, EEPROM Emulation Software RL78 Type 01 operates the Renesas Flash Driver (RFD) RL78 Type 01. And RFD writes and reads the data flash memory	<a href="#">Download</a>
17	<a href="#">RL78/G13 EEPROM Emulation Library Pack01</a>	This application note explains how to write and read data to and from data flash memory using the EEPROM Emulation Library Pack01 (Flash Data Library (FDL) and EEPROM Emulation Library (EEL)).	<a href="#">Download</a>
18	<a href="#">RL78 Family EEPROM Emulation Library Pack01 User's Manual</a>	EEPROM emulation is a feature used to store data in the on-board flash memory in the same way as EEPROM.	-
19	<a href="#">RL78 Family EEPROM Emulation Library Pack02 User's manual in Japan and Other Asian Countries (Japanese Release)</a>	EEPROM emulation is a feature used to store data in the on-board flash memory in the same way as EEPROM.	-
20	<a href="#">EEPROM Emulation Library EEL-T01 RL78 Series</a>	This application note describes the internal structure, the functionality and the software interface (API) of Renesas RL78 EEPROM Emulation Library (EEL) Type 01, designed for RL78 flash devices with so called Data Flash based on the MF3 flash technology.	-
21	<a href="#">EEPROM Emulation Library Type T01, European Release, RL78 Family</a>	This user's manual describes the internal structure, the functionality and the software interface (API) of Renesas RL78 EEPROM Emulation Library (EEL) Type 01, designed for RL78 flash devices with so called Data Flash based on the MF3 flash technology.	-

# RL78/G13 APPLICATION NOTE [SENSOR(1/2)]

Item	Title	Summary	Sample code
1	<a href="#">RL78 Family Sensor I2C Communication Middleware Control Module Software Integration System</a>	This application note explains sensor I2C communication middleware control module for Renesas sensors using Software Integration System (SIS).	<a href="#">Download</a>
2	<a href="#">RL78 Family Sensor Control Modules Software Integration System</a>	This application note explains the sensor control modules for HS300x and HS400x (Renesas high performance relative humidity and temperature sensor), FS2012, FS3000 and FS1015 (Renesas High Performance Flow Sensor Module), ZMOD4410 and ZMOD4510 (Digital Gas Sensors), OB1203 (Heart Rate, Blood Oxygen Concentration, Pulse Oximetry, Proximity, Light and Color Sensor) and I2C communication middleware for Renesas sensors using Software Integration System (SIS).	-
3	<a href="#">RL78 Family HS300x Sensor Control Module Software Integration System</a>	This application note explains the sensor control module for Renesas sensor HS300x (Renesas high performance relative humidity and temperature sensor) using Software Integration System (SIS).	<a href="#">Download</a>
4	<a href="#">RL78 Family HS400X Sensor Control Module Software Integration System</a>	This application note explains the sensor control module for Renesas sensor HS400x (Renesas high performance relative humidity and temperature sensor) using Software Integration System (SIS).	<a href="#">Download</a>
5	<a href="#">RL78 Family FS2012 Sensor Control Module Software Integration System</a>	This application note explains the sensor control modules for FS2012 (Renesas High Performance Flow Sensor Module) using Software Integration System (SIS).	<a href="#">Download</a>
6	<a href="#">RL78 Family FS3000 Sensor Control Module Software Integration System</a>	This application note explains the sensor control module for FS3000 (Renesas air velocity sensor) sensor using Software Integration System (SIS).	<a href="#">Download</a>
7	<a href="#">RL78 Family FS1015 Sensor Control Module Software Integration System</a>	This application note explains the sensor control module for FS1015 (Renesas air velocity sensor) sensor using Software Integration System (SIS).	<a href="#">Download</a>
8	<a href="#">RL78 Family OB1203 Sensor Control Module Software Integration System</a>	This application note explains the sensor control module for OB1203 (Heart Rate, Blood Oxygen Concentration, Pulse Oximetry, Proximity, Light and Color Sensor) using Software Integration System (SIS).	<a href="#">Download</a>
9	<a href="#">RL78 Family ZMOD4410, ZMOD4450 and ZMOD4510 Sensor Control Module Software Integration System</a>	This application note explains the sensor control modules for ZMOD4410, ZMOD4450 and ZMOD4510 (Digital Gas Sensors) using Software Integration System (SIS)	<a href="#">Download</a>
10	<a href="#">Sensor Software Combination Manual</a>	This application note describes code changes required to use the multiple sensor software combinations and runs on certain MCUs of the RA family, RX family, RL78 family and RZ family	-

[Return to the list of main items in the application note](#)

# RL78/G13 APPLICATION NOTE [SENSOR(2/2)]

Item	Title	Summary	Sample code
11	<a href="#">RL78/G13 Group Environmental sensor module control sample software</a>	This application note explains communication control sample software between "Renesas Starter Kit for RL78/G13", "ZMOD4410" and "HS3001".	<a href="#">Download</a>
12	<a href="#">OB1203 Sample application - Sample Code</a>	This application note describes the sample software that is for use with the OB1203 sensor and runs on certain MCUs of the RA family, RX family, and RL78 family, and RE01 group MCUs with 256 KB or 1500 KB of flash memory.	<a href="#">Download</a>
13	<a href="#">FS2012 Sample application - Sample Code</a>	This application note describes the sample software that is for use with the FS2012 flow sensor and runs on certain MCUs of the RA family, RX family, and RL78 family.	<a href="#">Download</a>
14	<a href="#">FS3000 Sample application - Sample Code</a>	This application note describes the sample software that is for use with the FS3000 flow sensor and runs on certain MCUs of the RA family, and RX family, RL78 family.	<a href="#">Download</a>
15	<a href="#">ZMOD4xxx Sample application - Sample Code</a>	This sample software acquires gas data from the ZMOD4410, ZMOD4450 and ZMOD4510 gas sensors and calculates the result. In combination with the I2C driver of the FSP, the sample software controls the ZMOD4410 and ZMOD4510 through the I2C in the MCU to measure gases, acquire ADC data, and calculate the acquired result.	<a href="#">Download</a>
16	<a href="#">HS300x Sample application - Sample Code</a>	This application note describes the sample software that is for use with the HS300x humidity and temperature sensor and runs on certain MCUs of the RA family, RX family, RL78 family, and RZ family.	<a href="#">Download</a>
17	<a href="#">HS400x Sample application - Sample Code</a>	This application note describes the sample software that is for use with the HS400x humidity and temperature sensor and runs on certain MCUs of the RA family, RX family, RL78 family, and RZ family.	<a href="#">Download</a>
18	<a href="#">FS1015 Sample application - Sample Code</a>	This application note describes the sample software that is for use with the FS1015 flow sensor and runs on certain MCUs of the RA family, RX family, and RL78 family.	<a href="#">Download</a>
19	<a href="#">RL78/G13 Group Sensirion environmental sensor module control sample software</a>	This application note explains the communication control sample software between "Renesas Starter Kit for RL78/G13 (RSK)" manufactured by Renesas Electronics Corporation and environmental sensor modules (SVM30, SCD30, and SPS30) manufactured by Sensirion.	<a href="#">Download</a>

# RL78/G13 APPLICATION NOTE [REALITY AI]

---

Item	Title	Summary	Sample code
1	<a href="#">RL78 Family Reality AI Control Modules Software Integration System</a>	This application note explains Data Shipper and Data Collector control modules for Renesas Reality AI, and general UART communication module using Software Integration System (SIS)	<a href="#">Download</a>
2	<a href="#">RL78 Family Reality AI Data Acquisition Module ( Data Collector / Data Shipper ) - Sample Code</a>	This application note describes sample software for data acquisition for Reality AI. Acquired data is converted into any files using Reality AI Data Storage Tool on PC.	<a href="#">Download</a>
3	<a href="#">RL78 Family Reality AI UART Communication Module Software Integration System</a>	This application note explains a UART communication module for Renesas Reality AI using Software Integration System (SIS).	<a href="#">Download</a>
4	<a href="#">RL78 Family Reality AI Data Collector Control Module Software Integration System</a>	This application note explains Reality AI Data Collector control modules for Renesas Reality AI using Software Integration System (SIS).	<a href="#">Download</a>
5	<a href="#">RL78 Family Reality AI Data Shipper Control Module Software Integration System</a>	This application note explains Reality AI Data Shipper control modules for Renesas Reality AI using Software Integration System (SIS).	<a href="#">Download</a>

[Return to the list of main items in the application note](#)

# RL78/G13 APPLICATION NOTE [SOFTWARE RELATION(1/2)]

Item	Title	Summary	Sample code
1	<a href="#">RL78 Software Porting Guide RL78/G13 sample code porting (CC-RL) (CS+, e2 studio)</a>	This application note describes how to port the RL78/G13 peripheral sample code to another RL78.	-
2	<a href="#">RL78 Software Migration Guide Source Code Migration from Assembly Language to C Language CC-RL</a>	This application note describes how to migrate the program in the assembly language for the CS+, which is the integrated development environment (IDE), to the inline assembler functions in the C language.	-
3	<a href="#">RL78 Software Migration Guide Migrating from CA78K0R to CC-RL (CS+)</a>	This application note describes how to replace the source codes created by the CA78K0R C compiler for the integrated development environment CS+ with the source codes supported by the CC-RL C compiler for the integrated development environment CS+.	-
4	<a href="#">RL78 Debugging Functions Using the Serial Port</a>	This application note describes how to use the RL78 debugging functions using the serial port.	-
5	<a href="#">RL78 Family C compiler CC-RL Programming Techniques</a>	This application note describes how to reduce the code size, increase the execution speed, and programming techniques to avoid bugs when using the C compiler CC-RL.	-
6	<a href="#">RL78 Family C Compiler Package (CC-RL) Application Guide: Programming Techniques</a>	This application note describes methods of programming for efficiency in terms of code size, speed of execution, and ROM size.	-
7	<a href="#">IAR Embedded Workbench for RL78 Programming Techniques</a>	This application note describes how to reduce the code size, increase the execution speed, and programming techniques to avoid bugs when using IAR Embedded Workbench for RL78.	-
8	<a href="#">RL78/G13 Usage Example of the Code Generator (Sample Program)</a>	This document describes using the sample program with the Code Generator for e2 studio. The CC-RL is used as a compiler in the sample program.	<a href="#">Download</a>
9	<a href="#">RL78/G13 Basic Initialisation for Cubesuite+ and IAR Toolchain</a>	This application note describes the basic setting items that are necessary for initializing the RL78/G13.	<a href="#">Download</a>
10	<a href="#">Integrated Development Environment e<sup>2</sup> studio How to use IAR Systems compiler in e<sup>2</sup> studio</a>	This document describes the procedure for using the IAR Systems compiler on the e2 studio.	-

[Return to the list of main items in the application note](#)

# RL78/G13 APPLICATION NOTE [SOFTWARE RELATION(2/2)]

---

Item	Title	Summary	Sample code
11	<a href="#">e<sup>2</sup> studio Creating and executing build CMake project</a>	This document explains processes how to create CMake project in e2 studio and execute Build.	-
12	<a href="#">Integrated Development Environment e<sup>2</sup> studio: How to use EGit in e<sup>2</sup> studio</a>	This application note guides user to use EGit in Renesas e2 studio environment.	-
13	<a href="#">RL78 Family CubeSuite+ Startup Guide</a>	The purpose of this document is to help the user understand how to use the RL78 family sample code in CubeSuite+ and also understand basic operations of development tools for the RL78 family.	-

[Return to the list of main items in the application note](#)

# RL78/G13 APPLICATION NOTE [OTHERS]

Item	Title	Summary	Sample code
1	<a href="#">RL78/G13 Multiplier and Divider/Multiply-Accumulator (A/D Converter in Sequential Conversion Mode)</a>	This application note explains how to use the multiplier and divider/multiply-accumulator in the multiply-accumulator mode (unsigned).	<a href="#">Download</a>
2	<a href="#">RL78/G13 Multiplier and Divider/Multiply-Accumulator (A/D Converter in Sequential Conversion Mode) CC-RL</a>	This application note explains how to use the multiplier and divider/multiply-accumulator in the multiply-accumulator mode (unsigned).	<a href="#">Download</a>
3	<a href="#">RL78 Family Notes and Countermeasures Against Noise</a>	This document describes notes and countermeasures against noise for the RL78 Family.	-
4	<a href="#">RL78/G13 and RX62N/RX621 Digital Stethoscope Reference Design</a>	Digital stethoscopes coupled to a lap top computer / tablet with suitable software and connected to internet for automated or remote diagnosis by a specialist, will be the future trend.	-
5	<a href="#">RL78/G13 Pulse Oximeter Reference Design</a>	Digital Stethoscope Reference Design	-
6	<a href="#">RL78/G13 Evening Out the Variations in Brightness of Multiple LEDs CC-RL</a>	This application note describes the procedures for adjusting LED drive current to even out the variations in brightness of multiple LEDs.	<a href="#">Download</a>
7	<a href="#">RL78 Software LCD Driver</a>	This application note gives an example how to drive and control a LCD by usual ports, using Renesas microcontroller RL78.	-
8	<a href="#">RL78 Family FFT Library: Deployment Guide</a>	This document provides information for deploying FFT Library. Fast Fourier transform (FFT) is an algorithm that executes the discrete Fourier transform at high speed.	<a href="#">Download</a>
9	<a href="#">RL78 Family RL78 Digital Signal Controller Library - Filter</a>	This document presents the specifications for a Digital Signal Controller(DSC) Library function library for the Renesas RL78 which includes generic specifications, detailed specifications for filter algorithm kernels and guidelines for the DSC Library API.	<a href="#">Download</a>
10	<a href="#">RL78 Family Application note Software-based Part Number Reading Out</a>	This application note explains how to read out part number by software.	-
11	<a href="#">78K0, 78K0R, RL78 and V850 Devices Flash Protection and Security Setting Guide</a>	This application note provides a state-of-the-art protection of the Flash contents against a fraudulent readout of the flash contents of the 78K0, 78K0R, RL78 and V850 devices and a guide to security settings of aforementioned Renesas Electronics embedded flash Microcontrollers (MCUs).	-
12	<a href="#">Application execution from RAM</a>	A lot of applications require the code execution from RAM like for example due to safety reasons or e.g. in case of bootloader for flash self-programming. This document will help you to set-up the projects based on the IAR environment.	-
