	05/03/01	V.1.11 Release 00	March 01, 2005 issue (TN3)						

Notes:

* : When a High-performance Embedded Workshop with the latest version has already been installed by other products, that one is adopted. Upgrading High-performance Embedded Workshop individually is available on the download site.

** : Be sure to install the E10A-USB emulator software before performing an E10A-USB self-diagnosing test program. This program is available on the download site.

When upgrading E10A-USB emulator software on this page, the previous versions of software has to have been installed in your PC before, or the previous versions of the set-up disc has to have been in a CD drive on your PC. Before installation of the E10A-USB emulator software, a confirmation dialog box which asks places of the previous one or the setup disc may be displayed.

The update program expands a set-up program under a temporary directory in Windows® to perform an upgrade. Files expanded under the folder is deleted automatically.

Therefore, Be sure to back up files you need before an execution of the update program.

Refer to the user's manuals bundled with your products for detail information on the installation method.

Notes:

* : When a High-performance Embedded Workshop with the latest version has already been installed by other products, that one is adopted. Upgrading High-performance Embedded Workshop individually is available on the download site.

** : Be sure to install the E10A-USB emulator software before performing an E10A-USB self-diagnosing test program. This program is available on the download site.

When upgrading E10A-USB emulator software on this page, the previous versions of software has to have been installed in your PC before, or the previous versions of the set-up disc has to have been in a CD drive on your PC.

Before installation of the E10A-USB emulator software, a confirmation dialog box which asks places of the previous one or the setup disc may be displayed.

The update program expands a set-up program under a temporary directory in Windows® to perform an upgrade. Files expanded under the folder is deleted automatically.

Therefore, Be sure to back up files you need before an execution of the update program.

Refer to the user's manuals bundled with your products for detail information on the installation method.

Notes:

* : When a High-performance Embedded Workshop with the latest version has already been installed by other products, that one is adopted. Upgrading High-performance Embedded Workshop individually is available on the download site.

** : Be sure to install the E10A-USB emulator software before performing an E10A-USB self-diagnosing test program. This program is available on the download site.

When upgrading E10A-USB emulator software on this page, the previous versions of software has to have been installed in your PC before, or the previous versions of the set-up disc has to have been in a CD drive on your PC.
Before installation of the E10A-USB emulator software, a confirmation dialog box which asks places of the previous one or the setup disc may be displayed.
The update program expands a set-up program under a temporary directory in Windows® to perform an upgrade. Files expanded under the folder is deleted automatically.
Therefore, Be sure to back up files you need before an execution of the update program.
Refer to the user's manuals bundled with your products for detail information on the installation method.

E10A-USB Emulator Software Component List for SH-4A device group
