

Outline

QE for AFE, the development assistance tool for analog front end, has been updated from V2.1.1 to V2.2.0.

1. Description

The main changes are as follows. For details of the update and how to install the product, refer to the release note at the link below.

<https://www.renesas.com/document/rln/qe-afe-v220-release-note>

1.1 New Feature

- Support [AFE Overview (QE)] View

A [AFE Overview (QE)] page is newly supported in the Stand-alone version, which makes it easier to open help documents, release notes, and download the sample program by clicking the links on this page.

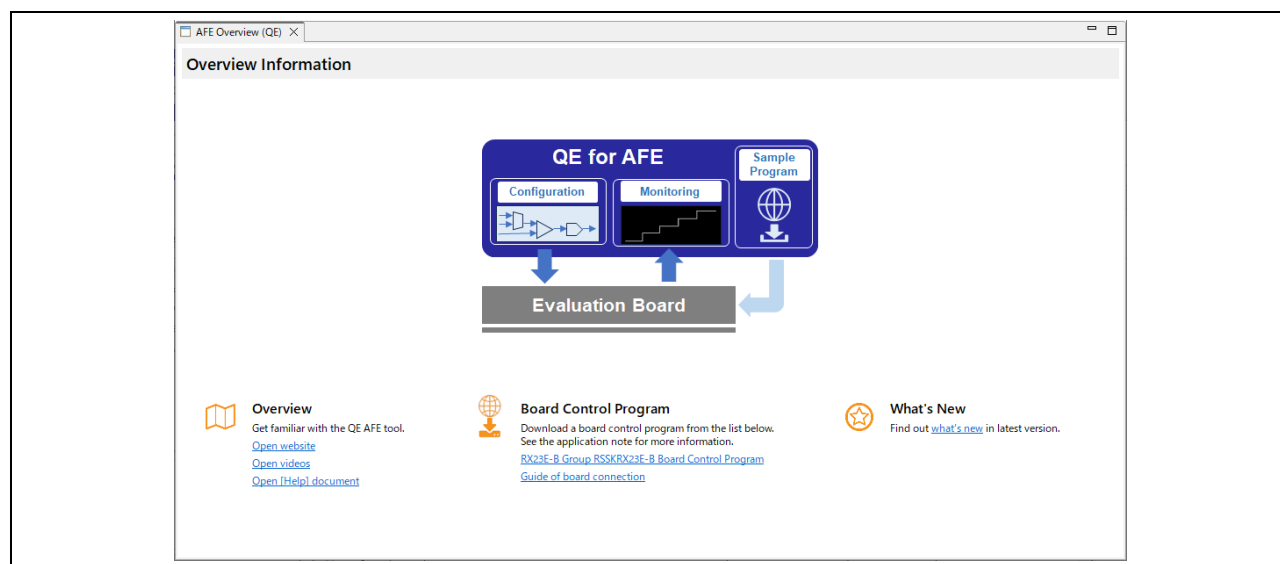

Figure 1 [AFE Overview (QE)] View

1.2 Improved Functionality

- Improve workflow when working in e2 studio
[Disconnect from Board] has been added to the menu-item.
- Improved download destinations for adjustment programs

The downloading destination of AFE adjustment program can be changed. By creating the [Target Board Name] folder in the folder and placing the sample project (zip file) corresponding to the target board, you can add it to the list of the [Select AFE Adjustment Program] combo box.

1.3 Addition of Supported Devices

- RA Family: RA2A2 group

2. Obtaining the Product

Download the installer for QE for AFE V2.2.0 from the link below.
